March 28	BASA AGM & Open Industry Forum, Castle Bromwich
March 28	BASA Industry Lunch, Castle Bromwich
May 1-2	ChemUK 2019, Harrogate
June 11	BASA Sports Day
September 11-13	FEICA Conference, Dubrovnik
November date to be confirmed	BASA Open Industry Forum
November 30	BASA Dinner Dance, Chester

Secretary's Welcome

Lorna Williams, BASA Secretary

Welcome to the 2019 edition of the BASA Member's Handbook, where we aim to provide members and other parties with information about the adhesives and sealants industry in the UK and Ireland. With over 100-member companies, BASA is the business association for the adhesive and sealants industry in the UK and Ireland. You will find information about each member company, an overview of the work of the association, an authoritative and practical 'Where to Buy' directory for adhesives, sealants, raw materials and ancillary products, a guide to the industry's Trade Names, Technical Standards, and much more.

Further information about BASA, its members, the Business Directory, plus useful guidance documents and further valuable information, can be found on our website at www.basa.uk.com

Together, this handbook and website offer specifiers, users and members of the association virtually everything they need to know about the industry and its products.

BASA Copyright 2019

THE MAX KOCHMANN AWARD WINNERS

This accolade, in memory of one of BASA's founders and former Life President Max Kochmann, is awarded for services to the association by a company or individual.

Year awarded	Name	Company
2005	Tony Bingham	National Starch & Chemical
2006	Roger Lester	BASF plc
2007	Bob Mabbutt	Bostik Ltd (Laybond Adhesives)
2008	Norman Purcell	Sealock Ltd
2009	Lorna Williams	Eastman UK (Synthomer)
2010	Paul Armitt	Itac Ltd
2011	Trevor Clarke	Pafrad Adhesives Ltd
2012	Will Barclay	Geocel Ltd
2013	Line Willis	Henkel UK
2014	Desmond Waight	DanGoods Training & Consultancy Ltd
2015	John & Lynda Murdoch	JMA
2016	Neil Sanders	F Ball and Company Ltd
2017	James Igoe	F Ball and Company Ltd
2018	Jim Palmer	J P Consultancy Ltd
2019	Mark Louch	Mapei (UK) Ltd

Past Chairmen

Since the creation of BASA, there have been 18 Chairmen:

1983/1984	<i>George P. Hutson National Adhesives & Resins</i>
1985/1986	<i>Max M. Kochmann Pafra Ltd</i>
1987/1988	<i>Colin D. Hall Ralli Bondite</i>
1989/1990	<i>Harry G. Werrell Swift Adhesives</i>
1991/1992	<i>Paul M. Jones Industrial Adhesives</i>
1993/1994	<i>Neil C. MacDonald Evode Ltd</i>
1995/1996	<i>Mike C. Ozier National Starch & Chemical Ltd</i>
1997/1998	<i>Malcolm C. Smith H. B. Fuller (UK) Ltd</i>
1999/2000	<i>Gerald E. Digby Bostik Findley Ltd</i>
2001/2002	<i>Paul C. Armitt Itac Ltd</i>
2003/2004	<i>Paul Dancer Nordson UV Ltd</i>
2004/2006	<i>Will Barclay Geocel Ltd</i>
2006/2007	<i>Guy Davis National Adhesives</i>
2007/2010	<i>Charles Hodgson Hodgson Sealants Ltd</i>
2010/2012	<i>James Igoe F Ball & Co Ltd</i>
2012-2015	<i>Guy Davis Beardow & Adams (Adhesives) Ltd</i>
2015-2018	<i>Mark Louch Mapei (UK) Ltd</i>
2018-Present	<i>Scott Challoner, Wacker Chemicals Ltd</i>

Chairman's Foreword

Scott Challoner, BASA Chairman

As Chairman of BASA, I very much welcome this opportunity to once again provide the foreword to this year's Handbook. 2018 felt rather frustratingly like Ground Hog Day with most of the key players in the Brexit discussions taking entrenched positions and the EU exit clock ticking onwards without a clear sign of resolution. Hopefully in 2019 we can finally reach a point where we have clarity and can move forward in both business and social senses.

The BASA Secretariat's work load and travel commitments in 2018 maintained its previous high levels, aiming to keep across the plethora of information being released from official bodies from both the EU and UK Government departments. We very much focused on trying to inform our members of potential matters arising as a result of a 'No Deal' Brexit and more importantly to try and give guidance of how to best navigate the challenges we could all face.

I would very much like to take this opportunity to thank the new members of our Council and to encourage others that would still like to get involved with the association. There are many ways this can be achieved without necessarily having to sit on Council. We also have very active working groups who would very much appreciate any time that you can give. We are also open to members suggestion if any of you feel there are other areas that you would like us to cover in more depth.

Having attended the Open Industry Forum in October I was really impressed with the event and could very easily see the value our members take from such gatherings. This will continue to be a key area for our Technical Steering Committee in 2019 whether it be a face to face function or alternatively by using BASA's website **www.basa.uk.com** as a portal for relevant industry information as well as updates on our forthcoming events.

BASA will also continue to be an active member of FEICA and whenever possible look to influence new UK industry regulations as well giving its thoughts on European matters when able. In essence, we will continue to be the voice for the British sealants and adhesive industry.

We very much look forward to seeing all of you in 2019 either at one of our more formal industry events such as this year's combined AGM, Open Industry Forum and Industry Lunch at the Jaguar Visitor Centre in March or at our Sports Day in June.

Scott Challoner
BASA Chairman
Wacker Chemicals

BASA Advantage Members

BASA have a number of Member Companies that also offer other Members advantage rates for their services.
As at 1st April 2018, we have the following offers for Members:

Hermex FX

Powered by leading online broker FxPro, is a complete Foreign Exchange provider and a specialist in Global Payment Solutions.

As the Official Currency Provider to BASA, our commitment to all members is to make your global currency payments as simple and cost effective as possible, whilst ensuring your account is being looked after by one of our dedicated account managers.

As an FCA authorised payment institution, we're a well-established, trusted and highly experienced name in the foreign exchange industry and we offer a straightforward, proactive service.

If you are a business making or receiving payments in overseas currencies, we can help you choose the best currency solution

WALLACE HIND
Where experience matters

to meet your needs and mitigate risk against adverse currency fluctuations that may affect your business.

As a BASA member, please call us for a free currency guide, quoting BASA on 0203 026 4030 www.hermexfx.com

Wallace Hind

Joining as a member in March 2018, Wallace Hind Selection are an executive retained recruitment consultancy that has an established reputation for successfully recruiting key personnel for major organisations across the UK and Europe. Wallace Hind offer a structured, rigorous and comprehensive route to market that consistently delivers. Their offering includes traditional headhunting, executive search

OAMPS
HAZARDOUS INDUSTRIES

and their bespoke eSearch methodology. Partnering with BASA members, Wallace Hind will dedicate time and expertise to gain an in-depth understanding of your business and your specific needs before undertaking any campaign. This affiliation is a two-way process, giving you the opportunity to question an experienced recruitment professional about your job specification, how to best write adverts, the most appropriate way to recruit, candidate availability and salary surveys (both geographically and industry specific).

OAMPS Hazardous Industries

With more than 30 years' experience, OAMPS continues to provide insurance solutions to businesses in the manufacture, blending,

supply, import, wholesale and distribution of chemicals.

We always begin by taking the time to gain an insight into how your business operates and all the risks you may be exposed to. That puts us in the best position to evaluate a wide range of insurance policies from leading insurers, then recommend the risk management and insurance plan that best suits you.

4ward Testing

As a Notified Test Laboratory (2538), 4Ward Testing is able to carry out all testing for performance requirements and for CE Marking purposes under the Construction Products Regulation (CPR) for ceramic adhesives, under EN12004-1, and sealants under the EN15651 series of standards.

The laboratory facilities and technical expertise, combined with customer communication focus throughout testing projects, has provided clients with the ideal testing model for over four decades, allowing your business to focus on increasing revenue streams.

4ward Testing is pleased to be able to offer BASA members a 5% discount on test programmes with a value over £1,000 + VAT, until further notice.

4ward Testing has expertise in the following:

- Material Testing and Product Testing to UK and International Standards
- Environmental Testing
- Benchmarking
- CE Marking
- Product Design & Development
- Bespoke Tests and Custom Rigs
- Quality Systems- Serving the Construction, Automotive, Aerospace, Oil and Gas and Manufacturing Industries.

Full details of any offers are posted on the new BASA website www.basa.uk.com under Advantage Partners. If any new Advantage Members are added during the 2018/19 subscription year, you will find the details there.

© vektor67 - stockadobe.com

BASA Affinity Partners

BASA also works with a number of non-members to provide services and information that may be of interest to members. Full details are available on the website.

ChemExec and Chemical Search International

BASA works with Chemical Search International to provide a number of Training and Development resources for members. Take advantage of great rates to attend one of the BASA training workshops or arrange a course at

your own premises. We use the Croner House Meeting rooms as a central facility to run the training workshops at very competitive prices, in conjunction with Chemical Search International. Watch out for information about courses available in 2018. In addition, there is also a specialist online Executive Club, helping professionals in the global chemicals, materials, resources and bioscience industries to develop skills, share ideas or pursue business ambitions.

REACHReady

BASA works in partnership with the Chemical Industry Association's REACHReady to offer all BASA Member companies discounted access to their Gold subscription. REACHReady provides a range of support to companies

affected by REACH, CLP (Classification, Labelling and Packaging) and the BPR (Biocidal Products Regulation).

There is a specialist Helpdesk that can be used wherever you are in the world to solve your REACH, CLP and BPR questions, and a range of online tools and guidance, tailored consultancy to accelerate your compliance, and the 'Matchmaker' service to match trusted suppliers of REACH, CLP and BPR services to your particular need. All of this is supported by a comprehensive training programme to help you understand everything from the basics to the more technical aspects of regulatory compliance.

Cogent Skills

BASA works with Cogent Skills on a number of topics related to Apprenticeships. Cogent Skills is a not-for-profit organisation with charitable status. The Cogent

Skills Group's strategic objectives are to have a pipeline of young people with the capability, drive and ambition to build a globally competitive science-based industry in the UK and to support the development of the existing workforce to acquire the skills needed to adopt new technologies, and innovate new products and services.

**Dubrovnik,

FEICA European Adhesive & Sealant Conference and EXPO 2019

11-13 September 2019

Valamar Dubrovnik Hotels

www.feica-conferences.com

Key growth markets for adhesives and sealants

Smithers Apex's Head of Publishing, Dan Rogers, presenting at the FEICA 2018 conference

The adhesives and sealants industry is seeing dynamic change on a number of fronts – with shifts in consumer requirements, changes in demographics in a number of regions globally, new regulations, sustainability pressures, and the advance of the digital age. Many of these topics were on the agenda at the FEICA 2018 event, where Smithers Apex spoke about market trends and forecasts for the adhesives and sealants industry. For this reason, we decided to focus on just three important areas of market development for the industry, and look at the drivers of growth over the coming years.

Automotive adhesives

The first key area is adhesives for automotive applications. The market for adhesives in automotive applications is currently estimated to be worth \$4.33 billion in 2017, and is forecast to reach \$7 billion by 2022, at a compound annual growth rate (CAGR) of 10.1%. By volume the automotive adhesives market will increase from 637 tonnes in 2017 to 908 tonnes by 2022, at a CAGR of 7.4%.

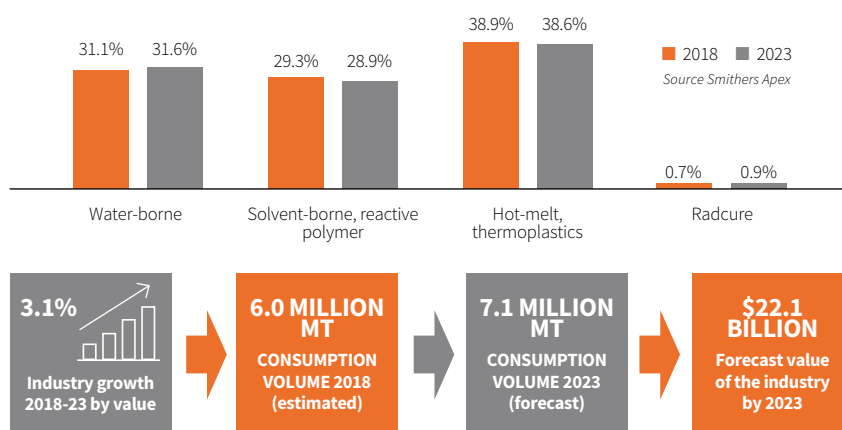

This dramatic growth is being driven the accelerating move in car production and sales from sedans and hatchbacks towards crossover and sports utility vehicles (CUVs/ SUVs); and growth in structural bonding for body-in-white (BIW) shell parts in advancing vehicle manufacturing processes.

BIW is seen by the automotive industry as a way to improve performance in durability, design flexibility, weight reduction, corrosion resistance, and noise, vibration, harshness (NVH) characteristics. Companies – including BMW, Ford, Jaguar Land Rover and Toyota – have combined adhesive bonding and riveting in vehicle production, illustrating the increasing penetration of adhesives in this sector. It is anticipated that use of this type of technology will spread from high-end vehicles into other segments of the industry over the coming years, as part of the significant growth forecast in this market.

Construction adhesives and sealants

Another interesting area is the construction

Global packaging adhesives industry – breakdown by adhesive type, 2018 and 2023, % in value

market. The global adhesives and sealants market for building and construction industry applications totalled about \$10.4 billion, and 4.18 million tonnes by volume, in 2017. By 2023 it is forecast to grow to about \$13.7 billion, and 5.47 million tonnes.

This sector is concentrated among a few major multinational producers, but with hundreds of smaller manufacturers – many in China and India – making specialised products. Construction is driven by regional (even local) architects, designers, contractors and distribution channels; but there is also considerable homogenisation of building methods and materials happening worldwide.

Changing demographics are a key driver of this market, and of changing product requirements for adhesives and sealants. Migration of populations to urban centres, and the shift from single-family homes to urban, multi-family dwellings is having an effect on how buildings are designed and constructed – and in turn on the adhesives and sealants needed. The exterior building envelope, for instance, is changing dramatically – from “stick-built” walls and roofs to factory fabricated curtainwall systems.

Widespread adoption of factory fabrication might shift large amounts of adhesive and sealant consumption from building sites to factories. Such a shift favours the use of high-performance, two-part reactive adhesives and of hot-melt adhesives, for instance.

Packaging adhesives

Thirdly, there is the rapidly changing packaging market for adhesives businesses to consider. The total volume of adhesives used in packaging applications was 5.86 million tonnes in 2017, valued at \$18.4 billion. Packaging adhesives consumption is forecast to grow to 7.05 million tonnes in 2023, with a corresponding value of \$22.1 billion.

A key trend in this sector, relevant to the adhesives industry, is the dramatic shift in packaging caused by the growth of e-commerce and its particular requirements. Materials suppliers are required to adapt as the consumer goods market changes rapidly due to e-commerce. For instance, it is expected that e-commerce will be responsible for nearly 15% of all retail sales by 2020 (*eMarketer*, 2017).

The long-term solution envisaged by much of the industry is the evolution of packaging to cover both on the shelf and e-commerce retail. “Omni-channel” selling, in which the demarcation between physical and digital retailing is blurred, will likely dominate. In this context, adhesives companies will need to be able to address the performance requirements of e-commerce shipping and handling; as well as focusing on suiting the packaging materials – such as corrugated – that will be prevalent in e-commerce applications.

Technical challenges in an uncertain future

Jim Palmer, BASA Technical Officer

As the year comes to an end there remains much uncertainty around the UK's exit from the European Union. So, 2019 promises to be a challenging year whatever deal/no deal/no exit situation our politicians decide/don't decide/abstain/postpone leaving us in (delete as applicable!). None more so than in the technical realm of our industry, with the complexity of dealing with the legislative implications of separate/combined/mirrored/continuing regulation and standards development. On top of that there is the relentless squeeze being applied to the rapidly diminishing number of chemical substances available for downstream formulators by the REACH and Biocidal Products Regulations. Fortunately, we have a wealth of experience and expertise within the technical community of BASA, who are working hard to interpret the implications for our industry of the various potential scenarios and to communicate them both to members and the government. So, to begin, I would like to thank them and their employers for their continuing commitment and tireless dedication.

Communication is, of course, key, and the BASA website continues to grow in usefulness in that respect. In the Members only area, you will find detail and information on all the major issues affecting our businesses. Where the implications may be wider than just the membership, we try to include these on the open area of the website as well. The new notification system was finally launched in January 2019, which will help you stay abreast of the subjects of personal concern by e-mail updates. You will be able to adjust the frequency at which you receive them, just make sure you log on, click on Membership Profile under your name on the top left of the dashboard screen to open the screen with the marketing preferences indicated, and make sure you have ticked the desired

ones for you. Try to make sure that at least one person at your company has chosen to receive the notices, which are just a summary of the documents posted in the last week/two weeks.

Alongside the website, the regular open industry forums and BASA Bulletins provide opportunity to discuss issues with industry colleagues and provide information to co-workers back at base.

In addition to the potential issues surrounding the UK exit from the EU, we continue to respond to the questions asked of our industry in relation to our impact on the environment. FEICA has produced an excellent video, which is available on the public area of the BASA website under BASA publications, entitled 'The World of Adhesives and Sealants'. The video illustrates the often unrealised role of our products in everyday life. It provides the perfect starting point for discussions about environmental issues, such as the circular economy, recycling, use of plastics and microplastic impacts.

We also continue our efforts to raise the profile of our industry by contributing to standards development and the work of sister trade associations. In addition to supporting the technical work of FEICA, we are active members of the Construction Products Association, technical and sustainability working groups, and the Alliance of Chemical Associations. Ongoing dialogue through these channels and directly with UK Government departments and quasi-government organisations means we hope to be the 'go-to' respondents on adhesive and sealants issues and ensure the industry is accurately represented.

The technical team have also responded to requests to give presentations on key industry issues at major conferences and

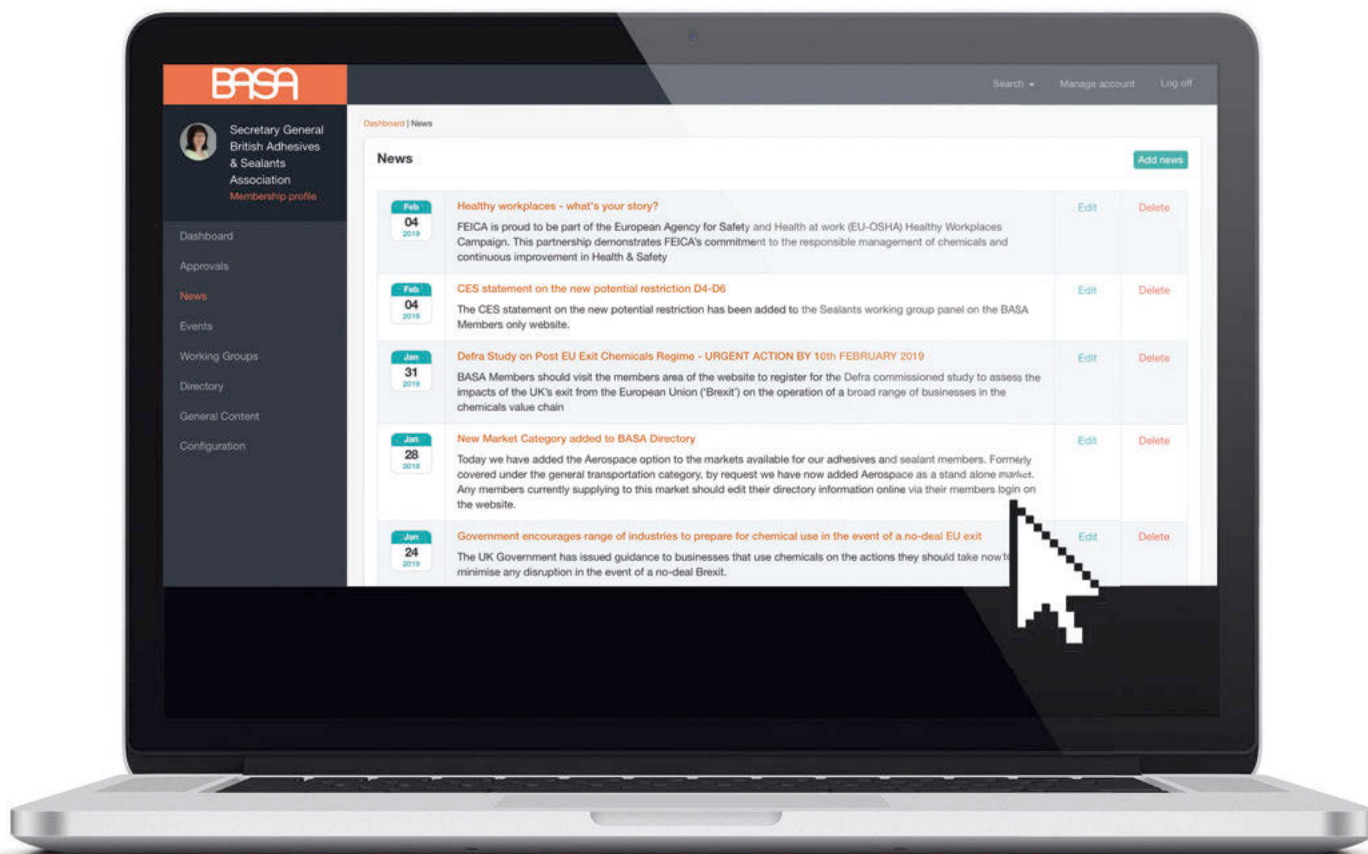

exhibitions. In 2018 we delivered lectures on circular economy thinking at Ecobuild and circular economy, the implications of diisocyanate restrictions, REACH, poison centres and training opportunities at Surfex. In 2019, we will also be contributing to the technical conference agenda at ChemUK in May.

Of course, there is always more we could do and we are dependent on volunteers from the industry contributing to this work. So, I would encourage you all to consider becoming involved, and I hope the foregoing has served to whet your appetite.

Statistics for 2018

During 2018 we responded to over 700 issues involving more than 1600 documents. The source of these subjects and discussions were EU initiated (30%), BASA (25%), CPA (25%) and other TAs (5%), FEICA (10%) and BSI (5%).

Please use the BASA website!

The BASA website is our primary communication tool with members. Each week we add ever more information. This includes:

- ✓ Business updates from affinity partner Croner
- ✓ Market information through the Business Steering Committee
- ✓ Latest information on Standards and Regulations,
- ✓ All the latest and archive Brexit information
- ✓ All the latest for each Technical Working Group
- ✓ Latest substance issues and alerts

Each member company can have as many

website subscribers as they want. They can apply for access online, by adding their details to their company via **www.basa.uk.com**. Once you connect to the website, you will be taken to the 'Welcome to BASA' page where you should click on 'Log In' in the middle panel. You will now be able to 'Register' by selecting 'Apply to an existing Company'.

The more eyes on the information the better, as particularly at present we are posting a lot of potential changes to regulations and product marking.

BASA Membership Certificates are also available digitally via your Membership Profile when on the members only area, so the new certificates are immediately available for members.

All BASA members have a free entry in this Handbook, and the information for the handbook is initially gathered by downloading the data in your BASA website Company details and directory information. It is therefore important that your information is kept up to date and particularly that the BASA Member Companies keep their data controller contact details up to date! Each member company has control over the data they put in the website for the online directory and Company profile, and then this data will be directly downloaded to populate the Handbook each year.

Any new Company is also able to apply online for membership directly via the website.

A year in pictures

With the increasing uncertainty in our sector due the predicted EU exit, the resultant regulatory, supply chain and trade concerns continue to be challenging for business planning. Many BASA Members had a hectic 2018, but at least attendance at the various BASA events gives members a chance to mix business with pleasure.

2018 started in March with our Industry Lunch and AGM at the Spectacular Twickenham Members Lounge with guest speaker Matt Dawson MBE. After our AGM was held for representatives from Member companies, guests were treated to a stadium tour followed by a sumptuous three course lunch. Matt Dawson entertained us with a selection of his show biz stories and ran through some coverage of his role in the 2003 world cup, focussing on the winning drop goal for England, kicked in the dying seconds of the game.

We then moved on to a sunny Sports day in June, where we returned to Hawkstone park for the golf and dinner and maintained our regular slot at the West Midland Shooting ground. We held the Open Industry Forum on the following day, however actual numbers of attendees were fewer than in 2017, so we will be trying something different in 2019.

The 2018 Dinner Dance at the Apex Hotel in Bath was well attended, although the numbers were down on the attendance at Chester in 2017, so we will be returning to the Grosvenor on 30th November 2019, by popular demand.

We then had a second OIF in November at Croner House where record numbers attended a varied agenda with additional Brexit input from BEIS (Business Enterprise and Industrial Strategy department, advising the UK government on Brexit and chemical strategy).

Enjoy this page of visual reminders of those gatherings, hopefully to encourage many of you to attend the events in 2019 and we would love to see some new faces booking for our events this year (as well as our regulars, of course!).

Our dedicated events website (www.basaevents.co.uk) will once again manage the bookings this year, in conjunction with Mint Events. All event dates are on the BASA website so keep an eye out for bookings for Sports day on 11th June 2019 and the Dinner Dance on 30th November 2019.

Benefiting Members

Driven by the diverse expertise of its members and consultants, BASA remains one of the most active technical adhesives and sealants associations across Europe.

BASA collates relevant information and advice on the importance of regulations and standards for the adhesives and sealants industry in the UK and Ireland, and this is underpinned by an extremely active technical programme.

BASA membership therefore continues to provide high value and contributes to business performance. It's little wonder therefore that membership is currently enjoyed by more than 100 UK and Irish companies.

BASA is also structured in such a way as to deliver maximum payback to its membership. It maintains five active working groups, all focused on keeping members updated about regulatory issues, and providing comment, evidence and information to governments and standards organisations.

Moreover, every year more than 600 staff and guests from member companies participate in BASA activities and more than half the membership are involved with our working parties.

Keeping abreast of regulatory issues

Anyone operating in our industry will be only too aware of how the pace of regulatory change is now moving so rapidly – and even more so after the decision to exit the EU.

As exiting regulations become ever more demanding, Government is also beginning to regulate in new areas that can have a wide impact. The upside is that BASA now serves as the accepted voice of the industry in the UK and Ireland. We retain strong links with government, industry, standards organisations such as BSI, CEN, ISO, as well as other associations across

the UK and Europe. We are also one of the leading national adhesive associations in Europe, contributing and putting the industry view to the European Commission, Council and Parliament via our affiliate: FEICA. Effectively, BASA gives our members a powerful voice when engaging with the decision makers.

Networking opportunities each year include:

- Annual General Meeting
- Annual Industry Lunch, with topical Industry Speakers after the AGM
- Free Open Industry Forums for Members
- Training days throughout the year
- At least 12 working group meetings during the year
- Sports day in June
- Other popular business/social networking days
- Annual Dinner dance in November each year.

Each event offers opportunities for sponsorship by both members and non-members.

BASA Website

Backing all of this up is the Members' Area of the BASA website, which contains a vast repository of useful information, including minutes and reports from BASA working groups, updates about industry standards, guides about new regulations, industry statements about topical issues of concern and news of BASA events and activities.

It includes free access to our European affiliate association FEICA, with news about regulatory affairs from Brussels and across Europe, and a vast directory of external websites.

© Michael Brown - stockadobe.com

Guide section and lower cost advertising opportunities. Non-members are required to pay full rates to advertise in this book.

Business Services

We offer a wide array of business services to meet our members' diverse requirements, including:

- The BASA Business Support Helpline, managed by Croner Consulting, offers members free information on a range of legal and employment matters
- Free access to two web-based Regulatory Helplines, also managed by Croner Consulting: Croner/ Health and Safety Expert and Croner/ Hazardous Substances
- BASA members enjoy special discounts with a number of external providers, including REACHReady – a telephone and web-based help desk to answer companies' questions as they move towards compliance with REACH; and 24-7 Responder for those members needing 24- hour emergency telephone cover for their products
- Privilege discounts on products and services from BASA's Advantage Members: 4ward Testing, OAMPS Hazardous industries, Wallace Hind and Hermex FX
- Through BASA membership, we provide access to the services of the Construction Products Association, including industry market data (that means you enjoy the privileges of CPA membership, without the subscription fees).

Importantly, the majority of our events are held within 30 minutes of an international airport, allowing overseas

participants to visit within a day, as networking is regarded as a key benefit of membership among many members. That's why we offer a combination of business, technical and social events throughout the year.

For international companies, we encourage their overseas staff to subscribe to the website and register to receive notices and reports of interest, and contribute to the technical discussions within the association.

We have retained a traditional hard-copy BASA Bulletin, which is published for the open industry forums, summarising the current work of the association and updating members on relevant legislation, and the affairs of the association. These are all key services designed specifically to help to ensure our members' continuing success. We also regularly publish electronic news updates and members stories via our BASA members website.

Promote your business

The BASA website is a major portal for our industry – and a unique free advertising opportunity for your company and products. Every month, it receives more than 1,000 visitors, while half our member companies come to our site for information they need. Importantly, members manage their own listings and information driving the Directory, making it easy to keep themselves fully up to date.

Each year, we also publish and circulate this, the BASA Handbook, with every single member receiving a free company profile and listing in the comprehensive Buyers

Representation across Europe

BASA is a leading member of FEICA – the Brussels-based association representing national adhesive and sealant associations, and larger multi-national adhesive, sealant and raw material producers.

We work closely with both FEICA and the other national associations to promote UK interests on the many European public affairs issues, including EU directives and regulations. As a BASA member, you also have free access to all FEICA services, including discounts to attend the European Adhesives Conference each September, free attendance at selected seminars and substantial discounts on a number of key market reports.

Along with the wide spectrum of benefits covered here, BASA is constantly striving to discover new ways to enrich your membership, because our members are the source of all that we do, in order to better our industry.

Council, Committees and Working Groups

BASA is governed by a ruling Council elected by rotation each year according to the Constitution.

As at 31st December 2018 Council Comprises:

Officers

Scott Challoner	Chair	Wacker Chemicals Ltd
Phillip Lee	Vice Chair	Ace Adhesives Ltd
Stuart Jenkinson	Vice Chair	H.B. Fuller UK Ltd
Tim Boniface	Treasurer	Instarmac Group Plc
Mark Louch	Immediate Past Chair	Mapei (UK) Ltd

Ex Officio Officers

Jim Palmer	TSC Chair	J P Consultancy Ltd
Paul Marshall	BSC Chair	Henkel UK Ltd

Council Members

Mike Climpson	Adco Ltd
Gary Dee	Bostik UK Ltd
Joe Kijowski	HB Fuller Ltd
John Robertson	Synthomer Ltd
Gary Thomas	Sherwin-Williams
Chris Young	Sealock Ltd

As of 1st January 2019, we have 3 vacancies for Council membership, and the current Council would like to encourage SME members to consider standing on Council as we would like to broaden the representation.

Technical Steering Committee

The Technical Steering Committee (TSC) supports Council by managing and overseeing the technical work of the association. Members of the TSC comprise the Chairmen of the technical working.

Jim Palmer	TSC Chair & BASA Technical Officer & WG Consultant & FEICA PU TWG	J P Consultancy Ltd
Lorna Williams	FEICA ETB Deputy Chair & FEICA Construction TWG Expert	BASA Secretary and Executive Officer

Jenny Barnett	Environment WG & FEICA HazPro	F. Ball and Co Ltd
Neil Sanders	Building Adhesives & Construction WG	F. Ball and Co Ltd
James Follows	Health & Safety WG	Apollo Chemicals Ltd
Simone Wubbe	Packaging Adhesives WG & FEICA PP TWG	Eastman Chemicals
Anthony Thresh	Sealants WG	Hodgson Sealants (Holdings) Ltd
Tony Bingham	FEICA Sustainability TF & WG Consultant	AGB Chemical Compliance

Working Groups

BASA's working and task groups cover a wide range of technical, standards and regulatory issues. Experts from member companies, supported by consultants where required, are tasked with the work of each group on behalf of the membership. Minutes and reports and any other guides and publications are available to members via the website: www.basa.uk.com

Building Adhesives & Construction Products Working Group

The BACWG represents members who supply construction adhesives and floor preparation compounds to the DIY, building and construction industry, including adhesives and grouts for ceramic tiles, floor and wall covering adhesives, bonding agents and levelling compounds, adhesives for woodworking, joinery and furniture assembly, with input into the BSI Mirror Committee

2K Polymer Systems Ltd

Address:

Venture Crescent, Alfreton, Derbyshire,
DE55 7RA

Tel: 01773 540440

Email: Andrew.Pace@2kps.net

Year of Formation: 2007

Number of UK & Ireland Employees: <10

Member Type: Adhesive / Sealant / Formulated
Product Suppliers

Company Profile:

2K Polymer Systems is a leading UK manufacturer of two component products for bonding, sealing filling, maintenance, repair and anchoring applications. We specialise in private label 2 component adhesive solutions for the

industrial, construction and consumer markets. Our modern manufacturing, filling and packaging facility based in Derbyshire supplies high quality products to our global customers via our international sales offices and warehousing operations in the UK, USA and Singapore. A unique combination of polymer formulation experience combined with innovative packaging solutions enables 2K Polymer Systems to present a robust product range delivering world class performance, with unrivalled usability and reliability – all personalised in your own brand. We offer 2 component structural adhesives and sealants, 2 component Epoxy putty sticks and tapes, 2 component Chemical anchoring products and epoxy and Polyester grouts and

mortars 2 component products are already widely used within the industrial and construction markets globally, however when using our “2K 1K” range of easy to use and sustainable packaging solutions, the use of complex mixing and expensive packaging options no longer apply.

Product Suppliers

Accreditations:

ISO 9001

Company Profile:

AdCo (UK) Limited is a specialist adhesive company supplying a range of highly technical based adhesives, allied products and application

equipment to a wide variety of markets including:
· Packaging · Furniture & Joinery · Printing & Bookbinding · Education · Arts & Crafts · Building & Construction · Product Assembly · Electronics.

AdCo has its own range of products and also offer the full range of speciality adhesives and sealants from international manufacturers, all of which have a comprehensive range that compliment each other. AdCo are official UK distributors for the full range of adhesives from AkzoNobel of Sweden, for veneering, laminating and structural timber bonding. With these product ranges behind us AdCo are able to offer a range of adhesives and allied products that are the envy of many adhesive companies. With our knowledge of adhesives and application techniques we offer a 'find & supply' service

to all, thus ensuring that any bonding problem can be solved.

In 2017 AdCo acquired the manufacturing, sales and distribution rights to the full range of speciality binding and printing adhesives, including Rioflex fan-a-part padding adhesive for NCR papers, previously manufactured by Howarine Calvert Ltd.

Ashland Specialties UK Limited

Address:

Vale Industrial Estate, Kidderminster, Worcestershire, DY11 7QU

Tel: 01562 821 207

Email: samanthahughes@ashland.com

Year of Formation: 1964

Member Type: Adhesive / Sealant / Formulated Product Suppliers

Principal Trade Names:

Aroset™, Blanose™, Culminal™, Klucel™, Natrosol™, Pliogrip™, PureKote™, PureLam™, PureRad™, PureSeal™, Purethane™, PVP/VA copolymers, V-Cap™, V-Pyrol™

Company Profile:

Ashland is a leading producer of high performance pressure sensitive adhesives and structural adhesives serving the industrial, converting, trans-

portation, medical and construction industries. Aroset adhesives are solvent based acrylic pressure sensitive adhesives with outstanding clarity, tack peel strength and resistance to UV, oxidation and heat resistance over a wide temperature range. These adhesives are manufactured in the United Kingdom as well as the US and are typically used in applications such as labels, decals, transfer films, mounting foam tapes, vinyl graphics, medical and removable. Pliogrip adhesives are two-part polyurethane adhesives and are used for bonding thermosetting composites, including SMC, RTM, FRP, SRIM, pultrusions, carbon fibre composites and many others. They are specified wherever critical performance is required and OEM approved. In addition to transportation applications, Pliogrip adhesive technology has been specified for aerospace, infrastructure,

industrial, and aftermarket repair applications. These products have been specified for bonding composite body panel assemblies, specialty components, under-the-hood and vehicle framing applications. There is a Technical Support Laboratory based in the UK, which allows a quick response to customers needs for custom designed adhesives and coater ready products by not only being able to make compounding modifications but also being able to make changes to the polymer during the manufacturing process. The on-going research at Ashland allows the development of new marketable technologies which address customer needs. Ashland's manufacturing sites are ISO registered and remain committed to safety, quality and to world-class manufacturing, customer service and technical.

Parent Company: BASF SE

Year of Formation: 1865

Number of UK & Ireland Employees: <10

Member Type: Raw Material Suppliers

Principal Trade Names:

acResin®, Acrodur®, Acronal®, Butofan, Dispex®, Eptal®, Foamaster®, Foamstar®, Hydrolat®, Joncryl®, Luphen®, Rheovis®, Styrofan®

Company Profile:

BASF are the world's leading chemical company, combining economic success with commitment to environmental protection and social responsibility. Through science and innovation, we enable our customers in nearly every industry to meet the current and future needs of society. Our portfolio ranges from chemicals, plastics, performance products and

crop protection products to oil and gas.

The range of raw materials offered by BASF for Adhesives & Sealants includes aqueous polymer dispersions and adhesive additives that have been optimized to suit a variety of applications. Our products are used especially in packaging, transportation, furniture and labels. For Pressure Sensitive Adhesives, our Acronal® and acResin® products make solutions possible in challenging adhesive applications. They are used for highly demanding labels, tapes, films and other special applications. We offer Adhesive Raw Materials for Industrial Adhesives in the following fields of application: packaging adhesives - especially for peel & seal envelope closures and labelling of plastic bottles, lamination adhesives - especially for glossy film overprint lamination and film/film composites, and lamination adhesives for the interior car trim, furniture foil and the shoe industry. In addition we have some special products to improve the adhesion of packaging adhesives on difficult surfaces.

Our Construction product range is equally

versatile. The main applications for our range of components are Ceramic tile adhesives, Flooring adhesives, Sealants, Flexible roof coating, Water proofing membranes, Primers, Mortar modification and concrete repair systems for example concrete plasticizers. BASF use BTC to distribute their portfolio of Adhesive Raw Materials in Europe. BTC Europe is BASF's pan-European distribution organization for small and medium-sized customers. BTC offer the full range of BASF products for the Adhesives & Sealants industry and are also able to offer complimentary products to the such as the Tinuvin® light stabilisers, Irganox® anti-oxidants and the versatile Oppanol® and Glissopal® polyisobutenes (PIB.)

Company Profile:

Beardow Adams is the UK's largest manufacturer of hot melt adhesives and one of Europe's top five such companies. Its products are used worldwide for packaging, labelling, product assembly, book-binding, woodworking, pressure sensitive coatings (for example, tapes and labels) and other coating and laminating applications.

To date, the company has won five Queen's Awards – four for International Trade and,

in 2002 for Innovation for its BAMFutura hot melt, a thermally stable, odour free product that is approved for direct food contact. With a manufacturing capacity of 50,000 tonnes/year, Beardow Adams has the single largest hot melt plant in Europe, its size representing an estimated 4% of world hot melt production.

Significant R&D expenditure has continued to enhance Beardow Adams' reputation for innovation in hot melt technology, especially in the areas of pressure sensitives, packaging and versatile assembly adhesives for bonding dissimilar materials. A global network of subsidiaries and partners serve over 10,000 customers in over 80+ countries worldwide.

British Adhesives & Sealants Association

Address:

24 Laurel Close, Mepal, Ely, Cambridgeshire,
CB6 2BN

Tel: 0044 3302 233290

Fax: 0044 3302 233408

Year of Formation: 1960

Number of UK & Ireland Employees: <10

Member Type: Testing/Consultant/
Equipment/Services

Company Profile:

As the voice for the industry, BASA supports its members by representing and promoting the industry, offering guidance on technical

and compliance issues, providing networking opportunities for members and providing members with support services.

BASA's antecedents stretch back to 1960 when adhesive and sealant manufacturers were invited to assist the UK government with the strategic planning of materials for the industry. During the ensuing period organisations such as the Adhesive Manufacturers Association, the British Resin Rubber Manufacturers Association, The British Adhesive Manufacturers Association and the Sealant Manufacturers Conference gradually coalesced in 1987 to form what is now Europe's

only independent trade body dedicated solely to the interests of the adhesives and sealants industry.

Member Type: Adhesive / Sealant / Formulated
Product Suppliers

Company Profile:

Cartell UK Ltd. is part of the Cartell group worldwide. It is one of the world's leading manufacturer of Adhesives and Sealants. The Cartell Group has a proven history of developing unique products under the brand MXBON. The Cartell group are also one of the biggest private/own label producers of adhesives for the retail and industrial sectors.

The Cartell group are known for Quality (ISO9001, 14001), design and Innovation providing significant advances in the adhesive market, and more specifically in the field of cyanoacrylate adhesives.

Cartell invest heavily in the development of sustainable products and processes for the future. In 2019 the Cartell group will deliver on the industrialisation of a novel crack-less process in the production of new advance range of cyanoacrylates (MECA). There is also a new MECA range of industrial adhesives which are odourless, non-blooming, non-hazardous with no compromises in shelf-life or cure performance.

The companies in the group are Research and Development focused with a passion for innovation. The Research and Development Departments can assist in the design and development of novel adhesives for challenge design solutions.

The Cartell group comply and meet all the requirement of European R.E.A.C.H and CLP regulations. It also invests heavily in obtaining approvals in order to support its customers in the following industrial sectors: -

- Gas industry (DVGW)
- Water industry (WRAS), food industry (NSF), medical device industry (USP VI) and electronics industry.

The Cartell Group have production facilities in UK mainland, Europe and several in Asia in order to provide a global solution to large organisations that require excellence in service, delivery and performance all over the world. With all these facilities at our disposal, Cartell UK Ltd is confident it can respond effectively when it comes to facing the challenges and uncertainty faced by Brexit.

Company Profile:

Direct Adhesives are manufacturers and distributors of water based and hot melt adhesives.

Direct are Premium Partners of Henkel Adhesives and supply Power Adhesives' range of hot melt glue guns and glue sticks. In addition, we are UK Sales and Service Partner for Timmer Pumps GmbH and also supply products from Buehnen GmbH. Our comprehensive product range covers adhesives for packaging, labelling, book, magazine and catalogue production, paper converting, envelopes, bag and sack manufacturing, tube winding, woodworking, footwear, engineering and flooring.

Direct Adhesives can manufacture and pack into customer's own labelled packaging in a wide variety of pack sizes. The company also produces it's own branded range of products for the woodworking, flooring, building, and DIY retail sectors. The technology range includes adhesives of the following chemical types:

Hot melt adhesives based on EVA, mPO, Rubber based pressure sensitive, PUR.

Shaped hot melt glue sticks based on EVA, Acrylic and Polyamide technology.

Aqueous adhesives based on polyvinyl acetate (PVA), aqueous co-polymers with low migration credentials, polyvinyl alcohol (PVOH), natural rubber latex, casein, dextrine, acrylics and animal glues.

We also supply solvented adhesives used for structural and manufacturing industries as well as cyanoacrylates.

Direct Adhesives' experience and market knowledge means that we can offer adhesive consultancy and technical support.

Eastman Chemical Company

Year of Formation: 1920

Number of UK & Ireland Employees: <10

Member Type: Raw Material Suppliers

Principal Trade Names:

Aerafin™ Amorphous Polyolefins, Benzoflex LA-705 plasticizer, Benzoflex™ 2088 plasticizer, Benzoflex™ 9-88 plasticizer, Benzoflex™ 9-88SG plasticizer, Benzoflex™ plasticizers, Eastman 168™ non-phthalate plasticizer, Eastman Effusion™ plasticizer, Eastman VersaBond™ plasticizer, Eastman VersaMax™ Plus

plasticizer, Eastman™ plasticizers, Eastoflex™ Amorphous Polyolefins, Eastotac™ resins, Kristalex™ hydrocarbon resins, Optifilm™ additives, Piccotac™ hydrocarbon resins, Regalite™ hydrocarbon resins

Accreditations:

ISO 9001

Company Profile:

Eastman Chemical Company is the global leader in raw materials for the adhesives and polymer modification industries and a leading supplier of a versatile plasticizer product line. We offer the broadest technology and product portfolio together with global manufacturing locations and an extensive sales and technology support network that blend technical expertise and innovation to deliver you a wealth of formulating options. We are committed to working with our

customers to provide innovation in key markets: film modification, labels, nonwovens, packaging, sealants, construction adhesives, plastics and tape.

For more than 50 years Eastman has been producing novel plasticizers that are used in a variety of market applications. Eastman's versatile plasticizer product line includes specialty and general-purpose non-phthalate plasticizers. We are committed to the long-term needs of our plasticizer customers in the shifting regulatory landscape. Eastman also produces a wide range of Eastoflex™ and Aerafin™ Amorphous Polyolefins, versatile PO polymers used to formulate improved Hot Melt Adhesives and Sealants.

Principal Trade Names:

Gypsol, Flowdol, Andricite, GGBS, Fordacal

Accreditations:

ISO 14001, ISO 9001, UKAS

Company Profile:

At Francis Flower we recover, reclaim and recycle mineral by-products from industry for the benefit of our customers and the environment.

Fordacal and Flowdol are manufactured by Francis Flower, a family business established in 1953. Over time, the business has expanded from its original quarrying and lime production enterprise to provide a range of high quality powdered minerals, including Gypsol anhydrite binder for flowing screeds, limestone powders for concrete and asphalt filler, as well as GGBS for lower CO2 concrete. All the products produced by Francis Flower originate as by-products

In 2019 the two companies will unite under the LKAB brand and merge the legal entities.

from industrial processes, reducing the need for mineral extraction and landfill.

With bases across the UK, Francis Flower is a trusted partner for both its UK and international customer

Company Profile:

FSi manufactures and develop a complete range of market leading compartmentation systems (Fire Rated intumescent acrylic sealant, Fire Rated silicone, Graphite sealant, Ablative coating, FR pipe collars, FR Compound, Batt etc...) suitable for applications all over the world.

Alongside this we have a comprehensive range of test data backing up these innovative products. These systems are primarily used to prevent or slow down the passage of elements, such as fire, air, sound, movement and water. We pride ourselves on the high level of testing and technical expertise that has been built up through years of experience within the industry, from site hand to dealing with large Multi-National conglomerates, this either under our brand or private label. This allows us to supply product both in the UK (BS Regulation) throughout Europe (EN Regulation) and Worldwide (EN and UL Regulation).

All of our main products are 3rd party certified. We also offer a complete range of systems which are CE Marked, showing that our quality can be measured. We are here to help and make sure the correct solution is specified correctly the first time to ensure budgets, timescales and required specifications are kept to.

Furthermore, alongside our market leading Fire Rated products, we manufacture as well a range of technical sealant (neutral cure silicone, acrylics etc) for application in the construction industry.

Company Profile:

Gorilla Glue Europe is part of The Gorilla Glue Company based in Cincinnati, Ohio. Gorilla as a brand has been available in the UK and Europe for over 10 years, with Gorilla Glue® itself sold in the USA for over two decades. The glue was first discovered being used in Indonesia on teak furniture, but consumers soon found it to be incredibly versatile and demand soared. On a mission to make products that deliver impressive results, the company has since expanded its offerings to include Gorilla Tape®, Gorilla® Super Glue, Gorilla® Grab Adhesive, and other

premium tapes, sealants, and adhesives. At Gorilla, we believe in high-quality products and choose to only put the Gorilla logo on products that meet rigorous development standards.

In addition to great products, we strive to be a great company for our employees. The Gorilla Glue Company is family-owned and operated and prides itself on its family atmosphere and fun-but-serious products. Our employees are our number one asset, and our company is dedicated to providing a healthy work culture centered on family values.

INTERTRONICS

Address:

Station Field Industrial Estate, KIDLINGTON,
Oxfordshire, OX5 1JD

Tel: 01865 842842

Email: info@intertronics.co.uk

Year of Formation: 1979

Number of UK & Ireland Employees: 11-100

Member Type: Adhesive / Sealant / Formulated
Product Suppliers

Accreditations:

ISO 9001

Company Profile:

INTERTRONICS supplies adhesives, coatings, sealants and equipment to customers with high

technology, high performance assembly applications. Our customers are manufacturers in industries such as electronics, medical devices, plastics, optical, automotive, energy, defence and aerospace.

We specialise in adhesives and adhesive systems, namely bonding, coating, sealing, encapsulating, potting, masking and gasketing products, together with the most appropriate equipment and accessories for surface preparation, mixing, application, dispensing, and curing them. The provision of insightful technical and applications guidance is a cornerstone of our business. We help you find the optimal materials and processes for the manufacture, assembly or repair of

your products, safeguarding and enhancing performance and integrity and, in turn, your profitability and reputation.

Ever since being established in 1979, when our main market was the printed circuit board assembly industry, we have enjoyed a reputation for customer focus, excellent service and post-sales support. We now supply over 3,000 regular customers, including multinational manufacturers, production facilities, specialist design and development businesses, universities, training organisations and government establishments.

Company Profile:

Leeson Polyurethanes Ltd develop, manufacture

and market solvent free PUR reactive hotmelts, PU adhesives, binders, anti-skid coatings and flexible polyurea based waterproofing membranes based upon one and two component polyurethanes for industrial applications. Formulations based upon aromatic and aliphatic polyurethanes are available. The company offers its customers the complete package of polyurethane adhesives and assistance with application equipment. Leeson Polyurethanes Ltd specialises in the development of products specifically designed to meet each customer's requirements and is the leader in its fields. Quality control is given an extremely high priority, with each product performance tested under conditions consistent with the customer's application before despatch. The company's commitment to quality has been recognised by the granting of approval to ISO 9001:2015. Through its technical dominance and economies of scale, it has been able to offer an unsurpassable

package of service to its customers both in the UK and export markets. Products include: One and two component polyurethanes including insulated panel lamination, wood bonding, light-weight panel lamination, foam conversion and specialised applications. PUR reactive hotmelts for wood bonding and panel lamination, polyurethane coatings for stone carpets, anti-skid coatings and industrial flooring, polyurethane binders for safety surfacing and sports pitches, liquid waterproofing, solvented polyurethanes for profile wrapping and textile lamination.

Company Profile:

Thanks to over 30 years in the business, providing advice for companies in 'high hazard' industries, we have deep knowledge and expertise of these businesses' insurance needs. Our knowledge and industry insight is fuelled by close working relationships with the leading industry

organisations.

We fit insurance to your business rather than trying to fit your business to an insurance product. Every business is unique. At OAMPS, we make it *our* business to understand yours. We always begin by taking the time to gain an insight into how your business operates and all the risks you may be exposed to. That puts us in the best position to evaluate a wide range of insurance policies from leading insurers then recommend the risk management and insurance plan that best suits you.

We offer a full suite of specialist insurance and risk management products for the fuel, hazardous haulage, chemical and environmental sectors, including:

- Motor
- Property

OAMPS
HAZARDOUS INDUSTRIES

- Goods in Transit
- Liability
- Business Interruption
- Personal Accident
- Directors & Officers Liability
- Cyber

OAMPS aims to help clients minimise risk through proactive risk management, however should you be unfortunate to be involved in an incident we have specialist services to make sure the process is as painless as possible and your business and reputation is protected.

Technology

Accreditations:

ISO 14001, ISO 9001

Company Profile:

Olin Epoxy is a leading global supplier of epoxy products. Formerly Dow Epoxy, we are proud to continue to provide customers with the

quality and reliability they have come to expect from us. Our leading technology has been the fundamental building block of robust solutions for diverse applications for more than 60 years. We continue to lead through innovative solutions for ever-changing global demands.

Olin Epoxy is a specialist in the development and production of Epoxy Resins, Epoxy Resin Hardeners, Glycidyl Ethers, Toughening Agents, Phenolic Curing Agents, Epoxy Emulsions and Dispersions and Intermediates. Enabled by our innovation to both process and products, Olin Epoxy serves a diverse array of applications, including wind energy, electrical laminates, marine coatings, consumer goods and composites, as well as numerous applications in civil engineering and infrastructure products.

We offer our customers high quality products and rapid service-driven action that makes us a reliable, successful and long-term partner in increasingly demanding markets. We successfully help shape and follow the direction of technological and legislative change in the most varied areas of application, especially focusing on environmentally-friendly products to meet increasing demand for low-emission epoxy resin systems. High product quality and optimal support service are tremendously important to us. We meet these demands through constant verification and adaptation of existing business processes, and our advanced system for monitoring incoming and outgoing goods. Our company was certified under DIN EN ISO 9001:2008 and EN ISO 14001:2004 which are verified and confirmed on a regular basis by frequent internal and external audits.

Email: jp@palacechemicals.co.uk

Year of Formation: 1978

Number of UK & Ireland Employees: <10

Member Type: Adhesive / Sealant / Formulated Product Suppliers

Principal Trade Names:

Houseplan, Langlow, Laticrete, Palace

Accreditations:

ISO 9001, OHS 18001, ISO 14001

Company Profile:

Palace Chemicals Ltd is a privately owned UK based manufacturer of Building Chemicals & Adhesives and DIY products which includes a comprehensive range of tile and stone adhesives, grouts and surface "after-care" products under two distinctive brands, namely PALACE and LANGLOW whilst also offering a fully supported "private label" service for large nationwide distributors preferring to operate under their own brand. Whilst Tiling products remain the core activity for Palace Chemicals, we were originally established in 1978 as a manufacturer of a broad

range of building chemicals and damp-proofing products and this expertise remains a central part of the company's product range today. The Palace building products range still includes Water-proofing systems, timber treatments, mortar admixtures, general purpose building adhesives and protective surface coatings. Palace acquired Langlow Products in 1995 which is one of the pioneering DIY brands offering a unique and extensive range of DIY solvents, Decorating sundries, wallpaper adhesives, Fillers, sealants and Paint removers all under the LANGLOW brand and designed to suit the needs of the Decorating professional or DIY enthusiast. Palace Chemicals operates to standards accredited by the BSI for the Quality assurance, Environmental Management & Health & Safety Management and remains committed to developing product formulation and manufacturing technology which ensures the range offered is provided at optimum service levels and remains at the leading edge of all applicable performance and quality standards. The PALACE range includes an extensive portfolio of Tile and Stone adhesives, grouts, sealants and surface After-Care products along with floor levellers and building chemicals. The high reputation our products and services have gained with both the professional and trade users encourages many of our larger customers &

distributors to choose Palace as their private label partner. In the DIY sector we offer the LANGLOW brand range of products which is one of the UK's longest established DIY names and offers an extensive range of DIY solvents, Decorating sundries, Wood treatments, Wallpaper adhesives and Paint removers, all packaged and presented to suit the needs of the DIY & Decorating market. Recently Palace has become the UK licensed manufacturer of the Laticrete range of Adhesives; Grouts & Specialist tiling products, which have a global reputation in some of the world's most prestigious and ambitious construction projects where product performance levels are often well in excess of the more established standards and further enhances the range of advanced Technology manufactured by Palace.

Product Suppliers

Principal Trade Names:

MA300, MA310, MA420, Plexus, Devcon,
Devweld, Dfense Blok, Flexane, Floor Patch,
Korrobond, Zip Patch

Accreditations:

ISO 9001, ISO 14001

Company Profile:

PLEXUS is a brand of ITW Performance POLYMERS, a division of Illinois Tool Works, which has some 250 operating units in 33 countries worldwide.

PLEXUS range of structural adhesives is supplied to many industries including Automotive, Truck, Mass Transit, Marine and Construction. The unique, high-performance structural adhesives represent a breakthrough in adhesive technology. They offer a combination of convenience, ease of use and superior mechanical strengths for bonding engineered plastics, composites and metals. PLEXUS adhesives can be mixed and dispensed using hand held cartridge dispensers or through automated metermix equipment. They are easy to dispense and possess excellent gap-filling characteristics. The thixotropic formulation of PLEXUS adhesives allow use on vertical or inverted surfaces without sagging and cure on their own at room temperature. PLEXUS's unique methacrylate technology is similar to the chemistry of many recyclable plastics, so PLEXUS adhesives may be reground and remoulded with the plastic.

DEVCON is renowned as technology and market leader in products and systems for plant

maintenance, repair and overhaul operations plus all types of industrial high performance structural bonding. A brand of ITW Performance Polymers, Devcon offers a comprehensive range of metal and ceramic filled epoxies, urethanes, adhesives and sealants throughout the UK, Europe, the Middle East and Africa. With over 40 years' experience, Devcon offers premium quality products which are used across a vast range of industries, solving problems, saving time, and cutting costs. The product range includes metal and ceramic-based epoxies, which the company has pioneered since the 1950's, containing either steel, bronze, aluminium, stainless steel or titanium, and when fully cured, can be drilled, taped or machined.

Product Suppliers

Principal Trade Names:

Graft IPT, Protecta

Accreditations:

ISO 14001, ISO 9001

Company Profile:

Polyseam Ltd, is a progressive organisation with offices in the United Kingdom, Turkey, Sweden, Norway and approved agents in the United Arab Emirates. Polyseam have been independently manufacturing 1st class brands in the UK for a majority of the world's leading suppliers of sealants, adhesives and fillers since 1993.

Our comprehensive manufacturing experience and capabilities, matched with dedicated

research and development investment, has positioned our products as the top quality in Europe. Through our fire research facility in Norway, our team of specialists' design and test products, this is underpinned by the commitment and certification of our quality management systems ISO 9001 & ISO 14001.

We at Polyseam continue to work hard in order to remain at the forefront of science and technology. Continuously adapting to ever changing environmental, industrial and economic pressures, developing innovative products and systems that equip trade professional with the right tools to do the job effectively and efficiently.

SERVICES

Manufacturing - Polyseam's manufacturing and packing operation is completely flexible and caters for long and short runs alike. This allows minimal order product runs and ensures a cost effective solution for large organisations testing new or potential markets and products, or smaller companies requiring modest quantities. Polyseam is able to offer standard product options as well as provide bespoke solutions for your specific requirement or unique product.

Quality Control - Our award of ISO 9001 standard

underlines our commitment to optimum quality standards. Our award of ISO 14001 standard highlights environmental management system and multiple aspects of our business procurement, storage, distribution, product development and manufacturing. As your manufacturer, we recognise that the quality of the product and the service we provide is reflected in your brand experience - therefore, we ensure we meet agreed supply criteria at all times. Packaging and Branding - We provide a wide range of packaging options, allowing flexibility for new product development. We can deliver the product in plastic flexi tubes, tubs and pails. Additionally, we can supply the product in bulk for the client to fill and package independently - allowing you to supplement your own production if required. Polyseam offers a complete design and print facility for all packaging types. We can assist in the design of packaging to complement other items in an existing range or produce a new brand identity for new ventures.

Stock and Logistics - Polyseam can work with and deliver in line with your own stock management systems. We can manufacture and deliver complete orders, or manufacture and hold stock in our warehouses for future distribution.

Troy Biosciences UK Ltd

Address:

71 Queen Victoria Street, London, EC4V 4BE

Tel: +44 7408816133

Email: troyuk@troycorp.com

Parent Company: Troy Corporation

Year of Formation: 1958

Number of UK & Ireland Employees: <10

Member Type: Raw Material Suppliers

Principal Trade Names:

Bacillat, Bodoxin, Fungitrol, Mergal®, Micropel®, Nuosept, Polyphase®, Troycat, Troychem, Troyguard™, Troykyd, Troymax,

Troysan®, Troysield™, Troysol, Troysperse, Troythix

Company Profile:

Troy Corporation develops and manufactures performance materials for industry. These materials are used and available in over 100 countries to produce high performing, cost-effective, and environmentally friendly products.

Troy's special areas of expertise include:

•Prevention of microbial degradation in products and processes

•Specialty materials to improve performance of the customer's products and their manufacturing

Troy produces over 400 products with modern manufacturing facilities in 6 countries. Troy supports our customers worldwide with Sales Offices in 15 countries, Distributors or Agents, Laboratories, Technical Staff and warehouse stocks. Troy's goal is to provide the customers a superior level of service and product availability.

Wacker Chemicals Ltd

Address:

Venture House, Arlington Square, Downshire Way, Bracknell, Berkshire, RG12 1WA

Tel: +44 1344 401670

Email: info.uk@wacker.com

Parent Company: WACKER CHEMIE AG

Year of Formation: TBA

Number of UK & Ireland Employees: <10

Member Type: Raw Material Suppliers

Principal Trade Names:

ELASTOSIL®, GENIOSIL®, HDK®, VINNAPAS®, VINNOL®

Accreditations:

ISO 14001

Company Profile:

UK subsidiary of Wacker Chemie AG. Wacker Chemie AG is the largest manufacturer of silicones in Europe with all manufacturing sites accredited to ISO 9001 and ISO 14001.

The ELASTOSIL® product range includes the full spectrum of silicone materials for all market sectors e.g. building and construction, rubber fabrication, consumer care, textile, paper, chemical, coatings, industrial sealing and bonding. For the Sealants industry Wacker offers raw materials as well as ready-compounded sealant in bulk, cartridges and foilpacks. In the GENIOSIL® range Wacker offer organofunctional silanes, prepolymers and "hybrid" sealants.

WACKER POLYMERS is a leading producer of

WACKER

state-of-the-art binders and polymeric additives based on polyvinyl acetate and vinyl acetate copolymers. They are used in construction chemicals, paints, surface coatings, adhesives and nonwovens, and in fiber composites and polymeric materials based on renewable resources.

Wacker also manufacture HDK® fumed silica - available in a range of hydrophilic and hydrophobic grades - which are used primarily for their thickening, thixotropic and reinforcing properties in the sealant, resin and surface coating industries.

Wallace Hind Selection LLP

Address:

The Old Vicarage, 1 Main Road, Duston,
Northampton, Northamptonshire, NN5 6JB
Tel: 01604 758857

Email: mail@wallacehind.com

Year of Formation: 1992

Number of UK & Ireland Employees: 11-100

Member Type: Testing / Consultant /
Equipment / Services

Principal Trade Names:

Wallace Hind Selection

Company Profile:

Wallace Hind Selection are an executive search and retained recruitment consultancy that have an established reputation for successfully recruiting key personnel for major organisations across the UK and Europe.

Since our inception in 1992, we have significantly developed our recruitment services to cover a full range of job disciplines and market sectors, sourcing key talent for a diverse range of clients, from owner managed businesses through to some of the UK & Europe's most recognised FTSE 100 Brands.

Our approach is structured, rigorous and comprehensive, one that consistently delivers.

These approaches include traditional Headhunting, Executive Search and our eSearch methodology.

Partnering with you, we dedicate time and expertise to gain an in-depth understanding of your business and your specific needs before undertaking any campaign. This affiliation is a

two way process giving you the opportunity to question a recruitment expert about your brief, the most appropriate way to recruit, candidate availability, remuneration and timescales. We approach every campaign with the same values.

- 69% of our business is repeat or recommended.
- 80% of our business is retained.
- Where we are retained, we fill 19 out of every 20 jobs.

What we do really does make a difference.

Due to the service levels we provide and the success rate of our process, many of our candidates become our clients.

HOW OAMPS CAN HELP BASA MEMBERS

Having provided advice for companies in 'high hazard' industries for more than 30 years, we have developed extensive knowledge of the risks and hazards these businesses face, and use this expertise to help tailor insurance cover for businesses like yours.

Every business is unique, and at OAMPS, we make it *our* business to understand yours; taking the time to understand how your business operates and all the risks you may be exposed to. Our knowledge and expertise allows us to assess how effective your risk management strategy is, and to offer suggestions where appropriate. Taking the time to get to know your business enables us to truly tailor our proposal to fit your businesses own unique needs, and be able to recommend the risk management and insurance plan that best suits your business.

We offer a full suite of specialist insurance and risk management products for the fuel, hazardous haulage, chemical and environmental sectors, including:

- Motor
- Property
- Goods in Transit
- Liability
- Business Interruption
- Personal Accident
- Directors & Officers Liability
- Cyber

Although our aim is to minimise risk through proactive risk management, should an incident occur, we have specialist services to make sure the process is as painless as possible, your business is protected and your hard earned reputation remains intact through effective early intervention.

WHO CAN WE HELP?

Companies who manufacture, blend, wholesale, import/export, store and/or haul chemicals across a diverse range of industry sectors.

So please contact us today to see how we can help you.
