**26 APRIL & 3 MAY 2022**

**📍 ONLINE**

Fundamentals of Adhesion & Adhesives is a two-part seminar series that aims to educate participants to the advantages and difficulties of adhesive bonding. Targeted towards students and delegates new to the industry, the seminar will introduce a variety of key topics within the field of adhesion & adhesives, including surface treatments, adhesive bonding, and joint performance with presentations from leading academics and industry professionals.

Adhesives are extensively used in industry and understanding how to achieve strong and durable bonding is essential for sustainable and safe structures.

Learning the fundamentals of adhesion science and adhesives practice, and the applications of these, enables users to successfully apply these techniques in their careers. Adhesive bonding is a vital enabling technology for strong and lightweight structures, which is a topical for electric vehicles and wind power generation.

### Part One

26 April

13:00 – 14:45 BST

### Part Two

3 May

13:00 – 14:45 BST

### Who should attend?

This seminar is aimed at undergraduate, postgraduate & research (PhD) students, as well as engineers and scientists who are new to the adhesives & adhesives bonding, or manufacturing industries. Academics, researchers and students who wish to further their careers in the disciplines of adhesive science and adhesives would also benefit from attendance at this event.

### Prices per webinar

£60 + VAT for IOM3 Members

£80 + VAT for Non Members / Students

Free for IOM3 Student Members
