See Events page on BASA website
www.basa.uk.com for details and how to book

March 25	BASA AGM & Open Industry Forum, SS Great Britain, Bristol
March 25	BASA Industry Lunch, SS Great Britain, Bristol
April 20-22	WAC 2020, Chicago
May 13-14	ChemUK 2020, Manchester
June 2-3	Surfex, Coventry
June 16	BASA Sports Day, Shropshire
September 9-11	FEICA Conference, Warsaw
November	BASA Open Industry Forum Date and venue TBC
November 28	BASA Christmas Dinner Dance, Stratford-upon-Avon

Secretary's Welcome

Lorna Williams, BASA Secretary

Welcome to the 2020 edition of the BASA Member's Handbook, where we aim to provide members and other parties with information about the adhesives and sealants industry in the UK and Ireland.

With over 100-member companies, BASA is the business association for the adhesive and sealants industry in the UK and Ireland. You will find information about each member company, an overview of the work of the association, an authoritative and practical 'Where to Buy' directory for adhesives, sealants, raw materials and ancillary products, a guide to the industry's Trade Names, Technical Standards, and much more.

Further information about BASA, its members, the Business Directory, plus useful guidance documents and further valuable information, can be found on our website at www.basa.uk.com

Together, this handbook and website offer specifiers, users and members of the association virtually everything they need to know about the industry and its products.

BASA Copyright 2020

THE **MAX KOCHMANN** AWARD WINNERS

This accolade, in memory of one of BASA's founders and former Life President Max Kochmann, is awarded for services to the association by a company or individual.

Year awarded	Name	Company
2005	Tony Bingham	National Starch & Chemical
2006	Roger Lester	BASF plc
2007	Bob Mabbutt	Bostik Ltd (Laybond Adhesives)
2008	Norman Purcell	Sealock Ltd
2009	Lorna Williams	Eastman UK (Synthomer)
2010	Paul Armitt	Itac Ltd
2011	Trevor Clarke	Pafra Adhesives Ltd
2012	Will Barclay	Geocel Ltd
2013	Line Willis	Henkel UK
2014	Desmond Waight	DanGoods Training & Consultancy Ltd
2015	John & Lynda Murdoch	JMA
2016	Neil Sanders	F Ball and Company Ltd
2017	James Igoe	F Ball and Company Ltd
2018	Jim Palmer	J P Consultancy Ltd
2019	Mark Louch	Mapei (UK) Ltd
2020	James Follows	Apollo Chemicals Ltd

Past Chairmen

Since the creation of BASA, there have been 18 Chairmen:

1983-1984	George P. Hutson National Adhesives & Resins
1985-1986	Max M. Kochmann Pafra Ltd
1987-1988	Colin D. Hall Ralli Bondite
1989-1990	Harry G. Werrell Swift Adhesives
1991-1992	Paul M. Jones Industrial Adhesives
1993-1994	Neil C. MacDonald Evode Ltd
1995-1996	Mike C. Ozier National Starch & Chemical Ltd
1997-1998	Malcolm C. Smith H. B. Fuller (UK) Ltd
1999-2000	Gerald E. Digby Bostik Findley Ltd
2001-2002	Paul C. Armitt Itac Ltd
2003-2004	Paul Dancer Nordson UV Ltd
2004-2006	Will Barclay Geocel Ltd
2006-2007	Guy Davis National Adhesives
2007-2010	Charles Hodgson Hodgson Sealants Ltd
2010-2012	James Igoe F Ball & Co Ltd
2012-2015	Guy Davis Beardow & Adams (Adhesives) Ltd
2015-2018	Mark Louch Mapei (UK) Ltd
2018-2020	Scott Challoner, Wacker Chemicals Ltd

Chairman's Foreword

Scott Challoner, BASA Chairman

As Chairman of BASA until 25th March 2020, I very much welcome this last opportunity to provide the foreword to this year's Handbook. 2019 was certainly a year of confusion, challenge and ultimately unexpected political clarity – at least in terms of having a majority government in place.

We started off the year wondering whether the 'promised' EU exit would occur at all. BASA certainly regretted the timing of our AGM which was scheduled for two days before the March exit date as it made confirming government speakers particularly challenging!

As the year progressed the situation in terms of parliamentary deadlock got worse, until in the end we were all left feeling that the only thing politicians could agree on was what they didn't agree on. At one stage the word 'coup' was even being used.

All the possible regulatory impacts certainly kept our technical teams busy – with an avalanche of 'no-deal' documents being sent out on a daily basis. The U.K. REACH Statutory instrument was heavily criticised by the Alliance of Chemical Associations, BASA is well represented here by our Secretary Lorna Williams as she is the voluntary Secretary of the Alliance. There are also difficulties with the proposed U.K. CA mark which potentially replaces CE marking under the same single European standards (fortunately BSI will remain a full member of CEN, regardless of any final deal).

The heavy technical program is covered in detail under the report by our Technical Officer Jim Palmer on page 10. Our clear priority in the short term is to make sure we influence new UK industry regulations and continue to be the voice for the British sealants and adhesive industry, whilst assisting Member companies to comply and trade with the rest of the world.

I would encourage you to contact the BASA Office if you have any suggestions for seminars, workshops or events on any topic, and we very much look forward to seeing you at our 2020 events.

Scott Challoner
BASA Chairman
Wacker Chemicals

BASA Advantage Members

BASA have a number of Member Companies that also offer other Members advantage rates for their services.
As at 1st January 2020, we have the following offers for Members:

4ward Testing

As a Notified Test Laboratory (2538), 4Ward Testing is able to carry out all testing for performance requirements and for CE Marking purposes under the Construction Products Regulation (CPR) for ceramic adhesives, under EN12004-1, and sealants under the EN15651 series of standards.

The laboratory facilities and technical expertise, combined with customer communication focus throughout testing projects, has provided clients with the ideal testing model for over four decades, allowing your business to focus on increasing revenue streams.

4ward Testing is pleased to be able to offer BASA members a 5% discount on test programmes with a value over £1,000 + VAT, until further notice.

4ward Testing has expertise in the following:

- Material Testing and Product Testing to UK and International Standards
- Environmental Testing
- Benchmarking
- CE Marking
- Product Design & Development

WALLACE HIND
Where experience matters

Wallace Hind

Joining as a member in March 2018, Wallace Hind Selection are an executive retained recruitment consultancy that has an established reputation for successfully recruiting key personnel for major organisations across the UK and Europe. Wallace Hind offer a structured, rigorous and comprehensive route to market that consistently delivers. Their offering includes traditional headhunting, executive search and their bespoke eSearch methodology. Partnering with BASA members, Wallace Hind will dedicate time and expertise to gain an in-depth understanding of your business and your specific needs before undertaking any campaign. This affiliation is a two-way process, giving you the opportunity to question an experienced recruitment professional about your job specification, how to best write adverts, the

- Bespoke Tests and Custom Rigs
- Quality Systems: Serving the Construction, Automotive, Aerospace, Oil and Gas and Manufacturing Industries.

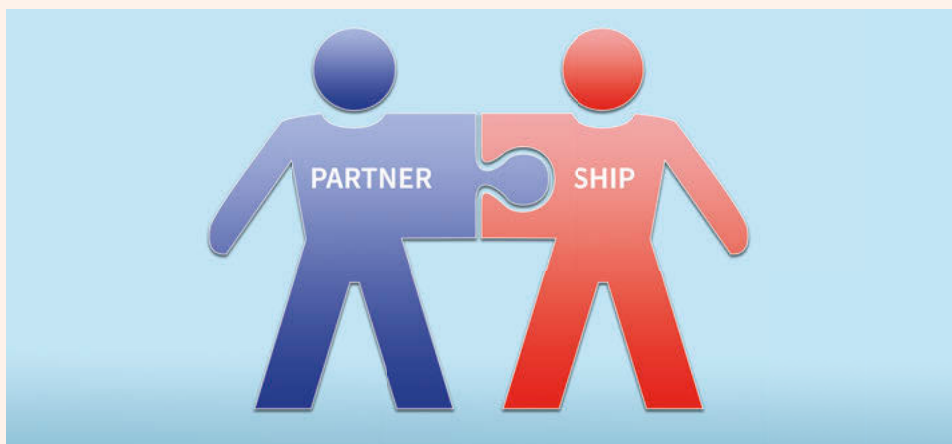

most appropriate way to recruit, candidate availability and salary surveys (both geographically and industry specific).

OAMPS Hazardous Industries

With more than 30 years' experience, OAMPS continues to provide insurance solutions to businesses in the manufacture, blending, supply, import, wholesale and distribution of chemicals.

We always begin by taking the time to gain an insight into how your business operates and all the risks you may be exposed to. That puts us in the best position to evaluate a wide range of insurance policies from leading insurers, then recommend the risk management and insurance plan that best suits you.

Full details of any offers are posted on the new BASA website www.basa.uk.com under Advantage Partners. If any new Advantage Members are added during the 2018/19 subscription year, you will find the details there.

BASA Affinity Partners

BASA also works with a number of non-members to provide services and information that may be of interest to members. Full details are available on the website.

REACHReady

BASA works in partnership with the Chemical Industry Association's REACHReady to offer all BASA Member companies discounted access to their Gold subscription. REACHReady provides a range of support to companies affected by REACH, CLP (Classification, Labelling and Packaging) and the BPR (Biocidal Products Regulation).

There is a specialist Helpdesk that can be used wherever you are in the world to solve your REACH, CLP and BPR questions, and a range of online tools and guidance, tailored consultancy to accelerate your compliance, and the 'Matchmaker' service to match trusted suppliers of REACH, CLP and BPR services to your particular need. All of this is supported by a comprehensive training programme to help you understand everything from the basics to the more technical aspects of regulatory compliance.

Croner

BASA works with Croner to offer access to Croner's more comprehensive services (over and above the free business telephone helpline) at a 15% discount for BASA Members as a result of the partnership between Croner and BASA. A pdf brochure is available on the BASA website to explain these additional services.

HMCA

BASA has agreed with HMCA to offer discounted rates for Medical Plans, Dental Plan, Hospital Cash Plans, Personal Accident Plan, Travel Plan, Income Protection and Vehicle Breakdown products. HMCA only offer medical plans to membership groups and can offer up to a 40% discount off the underwriter's standard rates. This is a comprehensive plan which provides generous cash benefits for surgery and other charges. Whatever the size of your company, from one employee to one hundred, HMCA can arrange a competitive tailored plan to suit your needs that can also include family and dependents. Call the dedicated company plan team on 01423 799942 or visit the website here: <https://www.hmca.co.uk/basa>.

BEB Contract & Legal Services

BEB are passionate about protecting businesses with bespoke, robust terms and conditions and contracts, and that's why they have partnered with BASA to offer 10% their Bronze, Silver and Gold packages. This means could get a fully bespoke set of terms and conditions for just £359.10 + VAT. They also specialize in sub-contractor agreements, GDPR and privacy policies, manufacturing agreements, distribution agreements and much more. If you find yourself signing contracts that you don't really understand, BEB offer a unique contract review service where we can check and confirm whether the contract you have been sent protect you fully, are clear and unambiguous or contain clauses that could be risky for your business. With the UK leaving the EU we expect that some BASA members may need a little more assistance in this area.

Facing a new decade – The outlook for the UK adhesives & sealants industry to 2025

As it enters the 2020s the UK adhesives and sealants industry is facing short-term uncertainty, tempered by the prospect of demand for new adhesives technologies and chemistries in certain niche applications.

Exclusive data from a study from Smithers conducted with the European adhesive sealant industry association (FEICA), shows that in 2019 the UK was the third largest EU market behind France and Germany. It has a market share of 14.9% by volume, in Western Europe – just over 460,000 tonnes. Market value in 2019 was €1.38 billion (£1.17 billion).

By 2024, it is forecast that total demand will approach 510,000 tonnes for the first time, while value will move beyond the €1.5 billion mark. Growth will be marginally below that in mainland Europe, however.

Brexit

The main short-term concern for British adhesives and sealants producers is the impact of Brexit. Uncertainty over the future of the UK's trading relationship was cited by the CBI, as one of the reasons for national manufacturing reporting its worst quarterly figures since 2009 in Q4 2019, and GDP growth slumping to 0%.

The victory of the Conservative Party in the December 2019 General Election has helped disperse some of this doubt. In the short term there is likely to be a boost, as investments companies had been suspending through the delays of 2019 will now be actioned.

The longer-term issue however is what the UK's future trading relationship with the EU will be. New border controls would affect many UK businesses, and international adhesives and sealants firms have already investigated relocating production and hiring additional warehouse space in mainland Europe.

A reduction of red tape is often cited as one reason for the UK leaving the world's largest trade bloc. The REACH

Table: European adhesives demand by product group

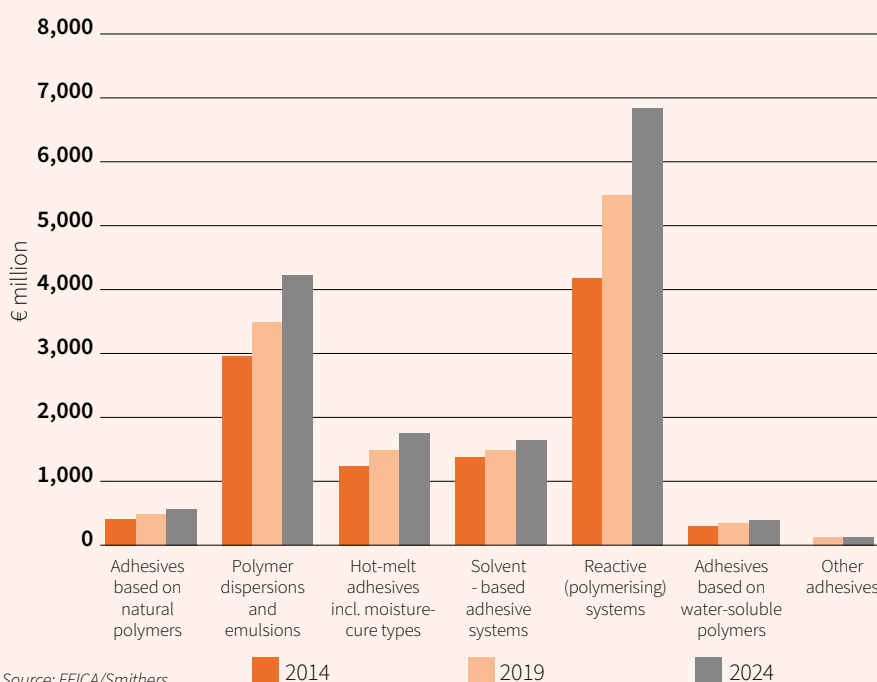

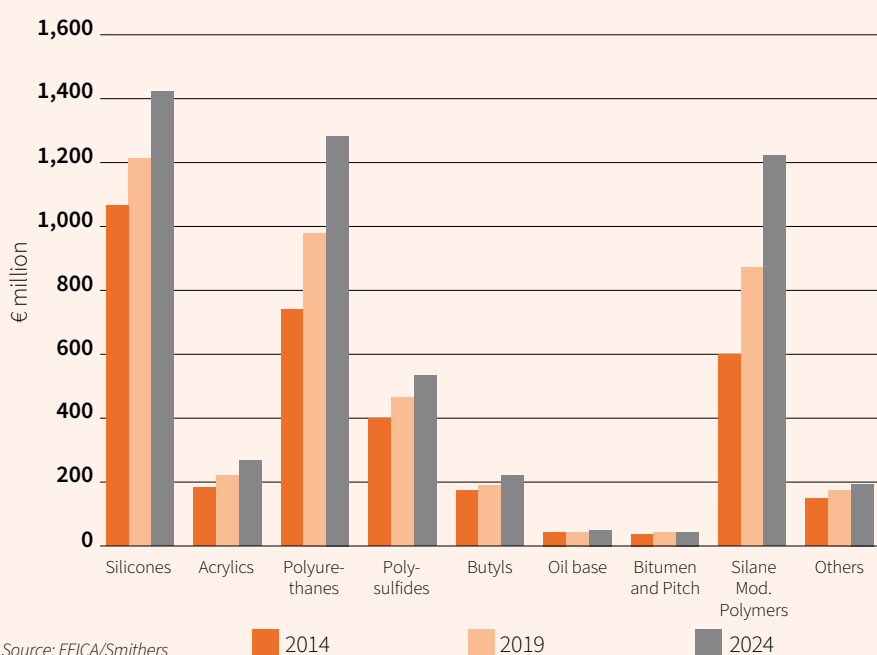

Table: European sealants demand by product group

Regulation – in particular – has been onerous for the adhesives and sealants industry. Smaller domestic manufacturers might benefit from a reduction in regulations. For international trade, there is little prospect for a reduced legislative burden however, especially as there is increasing convergence in fields such as chemical registration globally, often following the path made by REACH.

The prospect of a nationally based UK REACH would bring its own problems, as costs for REACH would then only be over UK volumes. This could see important raw materials disappear from the local market, with manufacturers only importing finished goods into the UK.

Hybrid formulations

In Europe there is an increased interest in hybrid reactive formulations. These combine different reactive adhesives – such as silicones and polyurethanes – and can deliver the functionality of both adhesives in one product.

Silane-modified polymers are forecast to have a strong growth across Europe in the coming years, as they are a hybrid solution with good performance and high sustainability standards. The market is also expanding for hybrid sealants, such as silicones with polyurethane and polyurethane with acrylics.

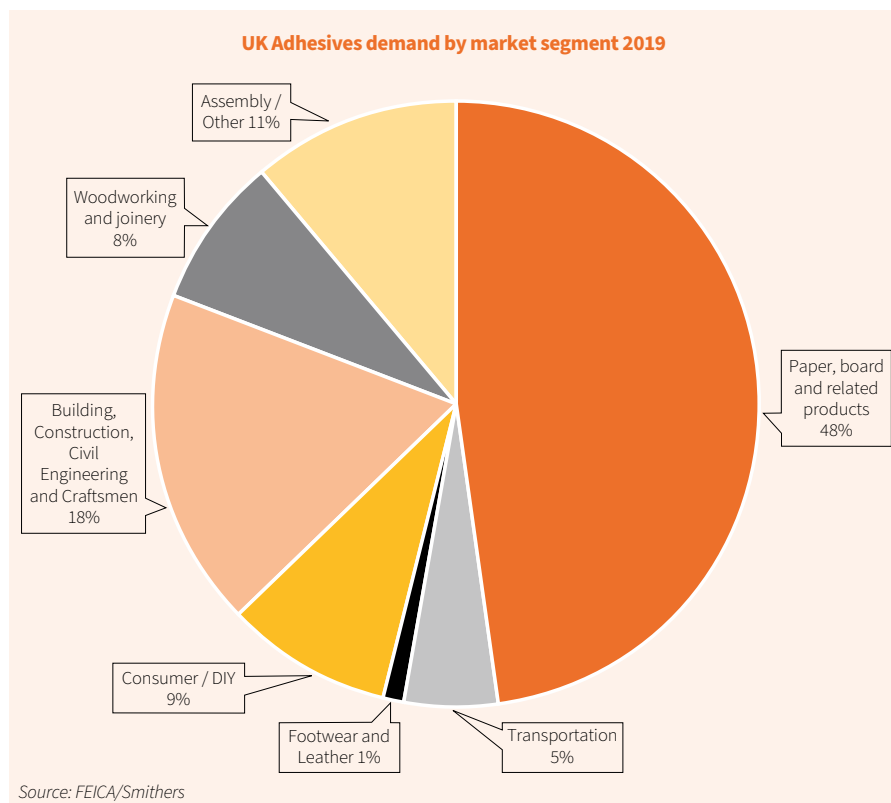

This trend will make reactive formulations the fastest growing adhesive type in the UK through to 2025.

Sustainability

Sustainability is a pressing concern in many industries that use adhesives and sealants. In the industry survey for the latest FEICA study ‘Sustainability considerations’ ranked third and define as ‘very important’ by respondents in both the adhesives and sealant markets.

Overall there this is manifesting in an interest in more precise dosing of adhesives to deliver the same bond but with less waste. It also creates an opportunity for adhesives to replace heavier or energy-intensive bonding solutions in industries, like car making; with lower weight alternatives translating into carbon savings across the vehicle’s lifecycle.

The EU’s circular economy agenda and pressure from brand owners, and ultimately consumers will help drive demand for more adhesives based on natural polymers based on starch or casein. This will be a gradual process as global supply chains

adjust adapt to this emergent demand and pursue incremental improvements to raise the naturally sourced content of different formulations. Initial market growth for these will be concentrated in packaging segments.

Green packaging

Besides the wider use of water-based solutions, packaging converters are also looking to improve how easy it is to dismantle and recycle packs at end of life.

A particular area of focus for R&D is adhesives that enable easier deconstruction in material recovery facilities. This is true especially for the flexible multi-layer laminate constructions, which currently pose the greatest challenge for recyclers. There will be a pull for smarter adhesive technologies that can debond on command at end of life; as well as adhesives that allow labels to be removed via washing or other simple processes.

Building and construction

Building, construction and civil engineering are the second largest users of adhesives and sealants in the UK; and the second fastest growing through to 2025. There is a technological shift from thermal and mechanical bonds towards ‘chemical’ adhesive bonding, especially in the building/construction and manufacturing/assembly industries.

In construction sealants and adhesives there will be a demand for more fire resistancy in adhesives, as the building industry responds to the Grenfell Tower fire in 2017 with new safety specifications. The major applications will be in bonding cladding, partition walls and dilation joints.

With an ageing workforce and difficulties in attracting younger people, the construction industry looks certain to face a skills crisis over the next decade. This creates an impetus for easier to use, efficient adhesives that require minimum surface preparation, limited or no premixing, and improved drying times.

About the Market report

The European Adhesives & Sealants Market 2019-2024 was prepared by Smithers on behalf of FEICA. The analysis is based on primary research and consists of market knowledge obtained by direct interviews from the adhesives and sealants industry (formulators, raw material producers, equipment suppliers) and analysed by Smithers. Founded in 1925 and headquartered in Akron, Ohio, Smithers is a multinational provider of testing, consulting, information, and compliance services.

www.smithers.com

To boldly go

Jim Palmer, BASA Technical Officer

I titled last year's piece 'into the unknown' and at risk of being called a prophet of doom, the situation seems just as bad if not worse! We have formally left the European Union, but still do not know what we will face beyond the transition period. For 2020 at least we must continue to comply with European Regulations, without any input to how they are formed, and at the same time prepare to comply with the UK Regulations that will replace them. Initially we are told that these UK Regulations will 'mirror' their EU equivalents, (even if that may be difficult to achieve and comply with) but going forward divergence would seem to be inevitable listening to the latest political statements. Combined with new border controls and customs arrangements, I think we are in for a testing time. Fortunately, we have a wealth of experience and expertise within the technical community of BASA who are working hard to interpret the implications for our industry of the various potential scenarios and to communicate them both to members and our government. So, to begin with I would like to thank them and their employers for their continuing commitment and tireless dedication.

The BASA website is invaluable in communicating the developing situations. In

the 'Members' area, you will find detail and information on all the major issues affecting our businesses. Where the implications may be wider than just the membership, we try to include these on the open area of the website as well. The notification system helps you stay abreast of the subjects of personal concern by e-mail updates and you are able to adjust the frequency at which you receive them. Regular notices, which are just a summary of the documents posted, are issued every 1 or 2 weeks. Additionally, our regular open industry forums and BASA Bulletins provide opportunity to discuss issues with industry colleagues and provide information to co-workers back at base.

The impact of our industry, along with all other industry sectors, on the environment is a growing issue. I referred last year to the FEICA video publication 'The World of Adhesives and Sealants', which can also be found on our website, it is still a good starting point for discussions highlighting the, often unrealised, benefit to society our industry brings. We are addressing the issues of sustainability of our products within the Environment and Sustainability working group and at the instigation of BASA Council we are forming a task group to examine the extent of the single use plastic product

packaging of our finished products and potential strategies to address the issue.

We also continue our efforts to raise the profile of our industry by contributing to standards development and the work of sister trade associations. In addition to supporting the technical work of FEICA we are active members of the Construction Products Association, technical and sustainability working groups, and the Alliance of Chemical Associations. Utilising dialogue through these channels and directly with UK Government departments and quasi-government organisations we hope to be the 'go-to' respondents on adhesive and sealants issues and ensure the industry is accurately and effectively represented.

As in previous years the technical team have given presentations on key industry issues at major conferences and exhibitions. At CHEMUK2019 we delivered lectures on advocacy for preservatives, the competency requirements for the marketing, specification and installation of fire stopping products, the EU diisocyanate restriction proposals, the future of UK chemical; regulations following our exit from the EU, the role of adhesives in securing sustainability and innovation, and the challenges of plastics and plastic packaging. In 2020 we shall be presenting on similar major issues at CHEMUK 2020 in May and Surfex in June.

Of course, there is always more we could do, and we are dependent on volunteers from the industry contributing to this work. So, I would encourage you all to consider becoming involved and I hope the foregoing has served to whet your appetite.

Statistics for 2019

During 2019 over 600 documents were posted to the BASA website members only area and the Secretariat, Consultants and Technical Working Groups responded to over 500 issues. The source of these subjects and discussions were EU initiated (30%), UK/BASA (20%), CPA (25%) and other TAs (5%), FEICA (10%) and BSI (10%).

FEICA® 2020

Warsaw, Poland

FEICA European Adhesive & Sealant Conference and EXPO 2020

9-11 September 2020

Warsaw Marriott Hotel

The adhesive and sealant industry's essential event

9, 10 & 11 September 2020

- **Network** with other professionals in the adhesive and sealant value chain.
- **Understand market dynamics**, market trends and emerging economic developments that could impact your business.
- **Tap into your end-users' needs** and learn what downstream users expect from you.
- **Expand your knowledge** of the advances in key technologies and applications from research and development professionals at the cutting edge of innovation.
- **Learn about raw material supply chain trends** and what your equipment suppliers have in store for you.

EXPO

9, 10 & 11 September 2020

The Table Top Exhibition opens on Wednesday 9 September at 15:00 and runs until Friday 11 September at 14:00.

Year-on-year, FEICA attracts 600+ industry leaders to discuss market drivers and trends, innovation, sustainability and technological advancements.

www.feica-conferences.com

Challenges and events in 2019

2019 finished with unexpected political clarity after the UK General Election, with the Conservative Party now forming a majority government, making gains in the labour heartlands that voted leave in the 2016 EU referendum. As such this left Boris clear to proceed with his Brexit plan and the withdrawal agreement was ratified by the UK on 23 January, by the EU on 30 January, and entered into force on 31 January. There is now a transition period until the end of 2020 while the UK and EU negotiate additional arrangements.

What will be on everyone's minds in 2020 is whether the UK and the EU can agree a trading relationship on the lines of the free trade agreement the EU has with Canada, or whether the relationship will be based simply on the Withdrawal Agreement deal agreed in October 2019. In either event, we are assured that the UK will be leaving the single market and the customs union at the end of 2020 and we should prepare for that challenging reality. BASA intends to offer Member Companies as much help as they can to navigate this, so please ensure you are all subscribed to the BASA website www.basa.uk.com

Looking back at other events in 2019, the BASA year started in March with our Industry Lunch and AGM at the impressive Jaguar Land Rover visitors centre. We held a shorter Open Industry Forum immediately before the AGM in the morning, which was very well supported by members and featured the ever-popular Simon Hart from RSM. We also had a great presentation from Professor Gary Critchlow, Loughborough university and some no deal and UK REACH guidance from BEIS and DEFRA representatives. After the AGM was held for representatives from Member companies, guests were treated to a delicious three course lunch and then in a new format all delegates took part in a fascinating factory tour in place of a speaker.

We then moved on to a less-than-sunny Sports Day in June, where we once again played golf at Hawkstone Park and enjoyed some more sheltered shooting at the West Midland Shooting ground. The die-hard croquet participants in the Omya sponsored competition got a little soggy but enjoyed the challenge of the return to the refurbished lawns.

The 2019 Dinner Dance returned to the Chester Grosvenor in November, by popular demand, and Council have requested booking again in 2021. The DJ was not as professional as we had hoped, but we will be trying this format again in 2020, but with a little more personality!

We then had a second OIF in November at Croner House where members attended a varied agenda with additional UK REACH input from a DEFRA representative who was somewhat constrained by the Purdah rules (we certainly manage to choose 'good' dates for BASA events!) and a regulatory representative from Kingfisher who gave us an enlightening view from a retailers perspective. We have some work to do in 2020 as UK REACH comes closer.

Enjoy this page of visual reminders of those gatherings, hopefully to encourage many of you to attend the remaining events in 2020 and we would love to see some new faces booking for our events this year (as well as our regulars, of course!).

Our newly revamped dedicated events website (www.basaevents.co.uk) will once again manage the bookings this year, in conjunction with Mint Events. All event dates are on the BASA website so keep an eye out for bookings for Sports day on 16th June 2020 and the Christmas party themed Dinner Dance on 28th November 2020 in Stratford upon Avon.

Benefiting Members

Driven by the diverse expertise of its members and consultants, BASA remains one of the most active technical adhesives and sealants associations across Europe.

BASA collates relevant information and advice on the importance of regulations and standards for the adhesives and sealants industry in the UK and Ireland, and this is underpinned by an extremely active technical programme.

BASA membership therefore continues to provide high value and contributes to business performance. It's little wonder therefore that membership is currently enjoyed by more than 100 UK and Irish companies.

BASA is also structured in such a way as to deliver maximum payback to its membership. It maintains five active working groups, all focused on keeping members updated about regulatory issues, and providing comment, evidence and information to governments and standards organisations.

Moreover, every year more than 600 staff and guests from member companies participate in BASA activities and more than half the membership are involved with our working parties.

Keeping abreast of regulatory issues

Anyone operating in our industry will be only too aware of how the pace of regulatory change is now moving so rapidly – and even more so after the decision to exit the EU.

As exiting regulations become ever more demanding, Government is also beginning to regulate in new areas that can have a wide impact. The upside is that BASA now serves as the accepted voice of the industry in the UK and Ireland. We retain strong links with government,

industry, standards organisations such as BSI, CEN, ISO, as well as other associations across the UK and Europe. We are also one of the leading national adhesive associations in Europe, contributing and putting the industry view to the European Commission, Council and Parliament via our affiliate: FEICA. Effectively, BASA gives our members a powerful voice when engaging with the decision makers.

Networking opportunities each year include:

- Annual General Meeting
- Annual Industry Lunch, with topical Industry Speakers after the AGM
- Free Open Industry Forums for Members
- Training days throughout the year
- At least 12 working group meetings during the year
- Sports day in June

- Other popular business/social networking days
- Annual Dinner dance in November each year.

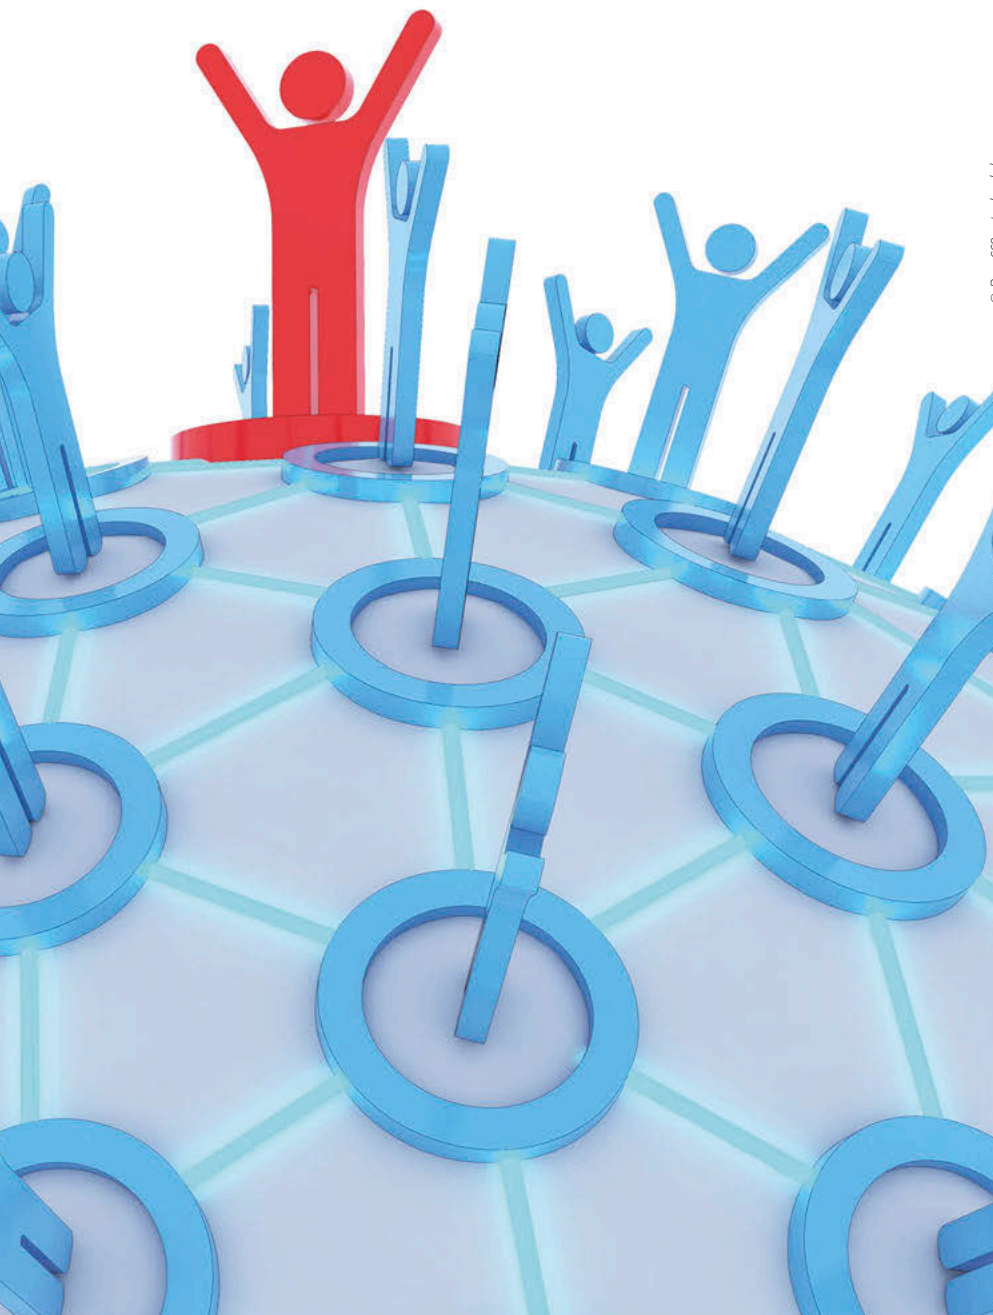

Each event offers opportunities for sponsorship by both members and non-members.

BASA Website

Backing all of this up is the Members' Area of the BASA website, which contains a vast repository of useful information, including minutes and reports from BASA working groups, updates about industry standards, guides about new regulations, industry statements about topical issues of concern and news of BASA events and activities.

It includes free access to our European affiliate association FEICA, with news about regulatory affairs from

© Pom669 - stockadobe.com

member receiving a free company profile and listing in the comprehensive Buyers Guide section and lower cost advertising opportunities. Non-members are required to pay full rates to advertise in this book.

Business Services

We offer a wide array of business services to meet our members' diverse requirements, including:

- The BASA Business Support Helpline, managed by Croner Consulting, offers members free information on a range of legal and employment matters
- Free access to two web-based Regulatory Helplines, also managed by Croner Consulting: Croner*i* Health and Safety Expert and Croner*i* Hazardous Substances
- BASA members enjoy special discounts with a number of external providers, including REACHReady – a telephone and web-based help desk to answer companies' questions as they move towards compliance with REACH; and 24-7 Responder for those members needing 24-hour emergency telephone cover for their products
- Privilege discounts on products and services from BASA's Advantage Members
- Through BASA membership, we provide access to the services of the Construction Products Association, including industry market data (that means you enjoy the privileges of CPA membership, without the subscription fees)
- Go to the BASA website to find out current offers and services for Member companies

Representation across Europe

BASA is a leading member of FEICA – the Brussels-based association representing national adhesive and sealant associations, and larger multi-national adhesive, sealant and raw material producers.

We work closely with both FEICA and the other national associations to promote UK interests on the many European public affairs issues, including EU directives and regulations. As a BASA member, you also have free access to all FEICA services, including discounts to attend the European Adhesives Conference each September, free attendance at selected seminars and substantial discounts on a number of key market reports.

Along with the wide spectrum of benefits covered here, BASA is constantly striving to discover new ways to enrich your membership, because our members are the source of all that we do, in order to better our industry.

Brussels and across Europe, and a vast directory of external websites.

For international companies, we encourage their overseas staff to subscribe to the website and register to receive notices and reports of interest, and contribute to the technical discussions within the association.

We have retained a traditional hard-copy BASA Bulletin, which is published for the open industry forums, summarising the current work of the association and updating members on relevant legislation, and the affairs of the association. These are all key services designed specifically to help to ensure our members' continuing success. We also regularly publish electronic news updates and members stories via our BASA members website.

Importantly, the majority of our events are held within 30 minutes of an

international airport, allowing overseas participants to visit within a day, as networking is regarded as a key benefit of membership among many members. That's why we offer a combination of business, technical and social events throughout the year.

Promote your business

The BASA website is a major portal for our industry – and a unique free advertising opportunity for your company and products. Every month, it receives more than 1,000 visitors, while half our member companies come to our site for information they need. Importantly, members manage their own listings and information driving the Directory, making it easy to keep themselves fully up to date.

Each year, we also publish and circulate this, the BASA Handbook, with every single

Working and Task Groups

BASA's working and task groups cover a wide range of technical, standards and regulatory issues. Experts from member companies, supported by consultants where required, are tasked with the work of each group on behalf of the membership. Minutes and reports and any other guides and publications are available to members via the website: www.basa.uk.com

As at the 31st December 2019 we have 5 active working groups and three technical task groups: Poison Centres, Polymers and the Construction Products Regulation (EU)

Building Adhesives & Construction Products Working Group

The BACWG represents members who supply construction adhesives and floor preparation compounds to the DIY, building and construction industry, including adhesives and grouts for ceramic tiles, floor and wall covering adhesives, bonding agents and levelling compounds, adhesives for woodworking, joinery and furniture assembly, with input into the BSI Mirror Committee.

Health and Safety Working Group

The BASA Health & Safety Working Group aims to inform the membership about forthcoming changes to legislation related to the supply and transport of dangerous goods, as well as general occupational Health & Safety legislation.

Environment & Sustainability Working Group

The scope of BASA's Environment Working Group includes reviewing proposed legislative changes and responding on behalf of BASA to regulators, government and NGO's.

Packaging Adhesives Working Group

BASA's Packaging Adhesives working group is responsible for liaison with FEICA regarding food packaging related regulation and for coordinating any UK position or feedback on migration issues and European Regulation of food contact adhesives.

Sealants Working Group

The Sealants working group informs members about current issues related to sealants, including legislation, standardization and market trends. The group will also ensure that our UK members industry point of view is communicated within Europe through FEICA and will actively represent the UK sealants industry interests on National, European and International technical committees in relation to product standardisation and specific legislative issues relating to sealants.

Poison Centres Task Group

This project group has been set up to inform members about their obligations under the article 45 of the CLP relating to Poison Centres.

Polymers Task Group

This virtual group has been set up to mirror the FEICA TTF which is looking at the European Commission project on how polymers of concern could be identified and registered under REACH. Please follow this group as we post documents and information as it arises.

CPR Task Group

This virtual Project Group page is used to collate all updates to the Construction Products Regulation and any information relating to the UK's EU exit and its likely affects.

Triple Payback from Croner

Three Helplines from Croner are included with your BASA Membership. Moreover, these valuable services are worth hundreds of pounds per year in saved company subscriptions to Croner. In today's challenging climate, it's more important than ever for employers to protect and develop their business in a legally compliant way.

Membership Benefits

As part of your association membership, you have access to free advice, seminars and webinars from our trusted partner, Croner.

You don't need to hire a solicitor for employment law advice, or employ a health & safety consultant to tighten up your policies and procedures.

Simply call **0844 561 8133** and quote **83324** to access:

24/7 HR & Employment Law Advice

- ✓ Conduct queries
- ✓ Sickness & absence
- ✓ Redundancy
- ✓ Dismissal
- ✓ Legislation changes
- ✓ Contracts

Health & Safety Assistance

- ✓ Fire safety
- ✓ Environmental legislation
- ✓ Hazard management
- ✓ Accident reporting
- ✓ Premises management
- ✓ The law and your responsibilities

Commercial Legal support

- ✓ GDPR
- ✓ Data protection
- ✓ Commercial contracts
- ✓ Insolvency
- ✓ Property

Tax Matters

- ✓ Free protection
- ✓ Tax and VAT consultancy
- ✓ Compliance checks
- ✓ Status

Free Business Seminars

- ✓ Regional employment law updates and events held across the UK for members

Free Monthly Webinars

- ✓ Presented by industry experts covering a range of important topics and FAQs

1. Getting the right advice and information is important, which is why BASA offers access to the Croner Business Support Helpline as a benefit of your membership subscription.

2. Croner-i Health & Safety has been designed to suit any business with health & safety needs, whether you're looking for general information, training materials, or want to inform a long-term strategy.

3. Croner-i Hazardous Substances is updated daily, with weekly e-alerts that highlight the latest news and new content. You can be certain that what you're reading is fully up-to-date with the current best practice and regulatory standards.

Additional Services

Through your membership, you're able to access these market-leading services at preferential rates:

HR Software

An award-winning system to help you record, monitor and easily manage your people data and HR tasks

Health & Safety Software

A pioneering management tool to help you meet safety laws and maintain the essential standards

Tribunal Support

Full tribunal representation, backed by qualified and experienced specialists

Croner Face2Face

On-site and in-person support and guidance through challenging HR meetings

SafeCheck

A two-part site visit to identify your workplace risks and provide a recommended action plan

Insurance

A legal insurance policy to protect you, cover costs, and provide peace of mind in the event of a claim

Speak to an expert

We're here to support you

2K Polymer Systems Ltd

Address:

Venture Crescent, Alfreton, Derbyshire,
DE55 7RA

Tel: 01773 540440

Year of Formation: 2007

Number of UK & Ireland Employees: 11-100

Member Type: Adhesive / Sealant /
Formulated Product Suppliers

Company Profile:

2K Polymer Systems (part of the MiTek Industries, a Berkshire Hathaway Group company) is a leading UK manufacturer of two component products for bonding, sealing

filling, maintenance, repair and anchoring applications. We specialise in private label 2 component adhesive solutions for the industrial, construction and consumer markets. Our modern manufacturing, filling and packaging facility based in Derbyshire supplies high quality products to our global customers via our international sales offices and warehousing operations in the UK, USA and Singapore. A unique combination of polymer formulation experience combined with innovative packaging solutions enables 2K Polymer Systems to present a robust product range delivering world class performance, with unrivalled

usability and reliability – all personalised in your own brand. We offer 2 component structural adhesives and sealants, 2 component Epoxy putty sticks and tapes, 2 component Chemical anchoring products and epoxy and Polyester grouts and mortars 2 component products are already widely used within the industrial and construction markets globally, however when using our “2K 1K” range of easy to use and sustainable packaging solutions, the use of complex mixing and expensive packaging options no longer apply.

Ashland Specialties UK Limited

Address:

Vale Industrial Estate, Kidderminster,
Worcestershire, DY11 7QU

Tel: 01562 821 207

Email: samanthahughes@ashland.com

Year of Formation: 1964

Member Type: Adhesive / Sealant /
Formulated Product Suppliers

Principal Trade Names:

Aroset™, Blanose™, Culminal™, Klucel™, Na-
trosol™, Pliogrip™, PureKote™, PureLam™,
PureRad™, PureSeal™, Purethane™, PVP/VA
copolymers, V-Cap™, V-Pyrol™

Company Profile:

Ashland is a leading producer of high
performance pressure sensitive adhesives and
structural adhesives serving the industrial,
converting, transportation, medical and

construction industries. Aroset adhesives
are solvent based acrylic pressure sensitive
adhesives with outstanding clarity, tack peel
strength and resistance to UV, oxidation and
heat resistance over a wide temperature range.
These adhesives are manufactured in the United
Kingdom as well as the US and are typically used
in applications such as labels, decals, transfer
films, mounting foam tapes, vinyl graphics,
medical and removable. Pliogrip adhesives
are two-part polyurethane adhesives and are
used for bonding thermosetting composites,
including SMC, RTM, FRP, SRIM, pultrusions,
carbon fibre composites and many others. They
are specified wherever critical performance
is required and OEM approved. In addition to
transportation applications, Pliogrip adhesive
technology has been specified for aerospace,
infrastructure, industrial, and aftermarket

repair applications. These products have been
specified for bonding composite body panel
assemblies, specialty components, under-the-
hood and vehicle framing applications. There
is a Technical Support Laboratory based in the
UK, which allows a quick response to customers
needs for custom designed adhesives and
coater ready products by not only being able
to make compounding modifications but also
being able to make changes to the polymer
during the manufacturing process. The on-going
research at Ashland allows the development of
new marketable technologies which address
customer needs. Ashland's manufacturing
sites are ISO registered and remain committed
to safety, quality and to world-class
manufacturing, customer service and technical.

Parent Company: BASF SE

Year of Formation: 1865

Number of UK & Ireland Employees: <10

Member Type: Raw Material Suppliers

Principal Trade Names:

acResin®, Acrodur®, Acronal®, Butofan,
Dispex®, Eptal®, Foamaster®, Foamstar®,
Hydropalat®, Joncryl®, Luphen®, Rheovis®,
Styrofan®

Company Profile:

BASF are the world's leading chemical
company, combining economic success with
commitment to environmental protection
and social responsibility. Through science and
innovation, we enable our customers in nearly
every industry to meet the current and future

needs of society. Our portfolio ranges from
chemicals, plastics, performance products and
crop protection products to oil and gas.
The range of raw materials offered by BASF for
Adhesives & Sealants includes aqueous polymer
dispersions and adhesive additives that have
been optimized to suit a variety of applications.
Our products are used especially in packaging,
transportation, furniture and labels.
For Pressure Sensitive Adhesives, our Acronal®
and acResin® products make solutions possible
in challenging adhesive applications. They are
used for highly demanding labels, tapes, films
and other special applications.
We offer Adhesive Raw Materials for Industrial
Adhesives in the following fields of application:
packaging adhesives - especially for peel &
seal envelope closures and labelling of plastic
bottles, lamination adhesives - especially for
glossy film overprint lamination and film/film
composites, and lamination adhesives for the
interior car trim, furniture foil and the shoe
industry. In addition we have some special

products to improve the adhesion of packaging
adhesives on difficult surfaces.
Our Construction product range is equally
versatile. The main applications for our range
of components are Ceramic tile adhesives,
Flooring adhesives, Sealants, Flexible roof
coating, Water proofing membranes, Primers,
Mortar modification and concrete repair
systems for example concrete plasticizers.
BASF use BTC to distribute their portfolio of
Adhesive Raw Materials in Europe. BTC Europe is
BASF's pan-European distribution organization
for small and medium-sized customers. BTC
offer the full range of BASF products for the
Adhesives & Sealants industry and are also
able to offer complimentary products, such
as Rheovis® Rheology modifiers, Dispex®
Dispersants, Tinuvin® light stabilisers, Irganox®
anti-oxidants and the versatile Oppanol® and
Glissopal® polyisobutenes (PIB.)

AquaBAM, Aquaroyal, BAM, BAMCare, BAMClean, BAMFutura, BAMSolve, EcoBlock, Estraticol, Europanol, Koltac, Landobond, Landocoll, Naturabond, Plattonal, Pressen, Prodacoll, Prodas, Signacoll, Tissuecol, NaturaCoat

Accreditations:

ISO 9001, ISO 14001

Company Profile:

Beardow Adams is the UK's largest manufacturer of hot melt adhesives and one of Europe's top five such companies.

Its products are used worldwide for packaging, labelling, product assembly, bookbinding, woodworking, pressure sensitive coatings (for example, tapes and labels) and other coating and laminating applications.

To date, the company has won five Queen's Awards – four for International Trade and, in 2002 for Innovation for its BAMFutura hot melt, a thermally stable, odour free product that is approved for direct food contact.

With a manufacturing capacity of 50,000 tonnes/year, Beardow Adams has the single largest hot melt plant in Europe, its size representing an estimated 4% of world hot melt production.

Significant R&D expenditure has continued

to enhance Beardow Adams' reputation for innovation in hot melt technology, especially in the areas of pressure sensitives, packaging and versatile assembly adhesives for bonding dissimilar materials.

A global network of subsidiaries and partners serve over 10,000 customers in over 80+ countries worldwide.

STS

Company Profile:

STS - BESPOKE HANDLING EQUIPMENT

STS has been designing and manufacturing the

highest quality drum handling equipment for over 20 years. Experts in the field, they design and manufacture tailor-made drum handling solutions for the Chemical and Adhesive Industry. STS products are designed to be fully-compliant, versatile and long-lasting, suitable for use in all industrial environments.

For adhesive manufacturers, the effective handling of raw materials and finished products is a crucial part of daily operations. Manual handling challenges exist when lifting, tipping and mixing drums in the workplace. STS has worked with a wide range of companies and has provided products that integrate seamlessly with process equipment.

The introduction of STS equipment into

the workplace results in two main benefits; improved health and safety, resulting in a happier healthier workforce as well as measurable efficiency improvements reducing the cost-basis of manufacturing.

STS regularly updates products to incorporate feedback from the industry. All units can be configured to include a range of 'optional features' to ensure they fulfil all customer requirements, features include ATEX-certified units, powered functions and load-cell weighing systems.

The complete range of STS drum handling and ATEX equipment is featured on their website.

Company Profile:

Ennis-Flint is the worldwide leader in the traffic

safety and road marking industry providing the most comprehensive lineup of road marking solutions on the market today. The EMEA headquarters, located in Chorley, United Kingdom, provides a range of products from traditional paints and thermoplastics to high-performance formulas and plural components for road marking and enhanced surface treatments. You can find Ennis-Flint products on roads and highways, taxiways, runways, parking bays and in all kinds of commercial, contractor, governmental, industrial, airport and architectural settings. Moreover, Ennis-Flint provides a wide range of crack sealant products intended for use on various pavement and carriageway defects. Our Fibrescreed and Prismoseal products offer high output crack sealing on major highways through the use of bitumen technology. With proven flexibility,

excellent adhesion, and environmentally-friendly ingredients, this range of products is sure to extend the life span of the asphalt. Ultimately, each of our products offers cost effective answers to road safety problems while increasing safety for all road users.

Flexi-Coat, NS Putty, NS Putty Pads, Pass-It Transit System, PipeBloc EL, PipeBloc PCP, PipeBloc PWP, PS Coating, Pyrocoustic, Pyropro HPE, Pyropro LST, Silverflame Batt, Silverseal, Silverseal HSF, S-Line Pillows, Stopseal

Accreditations:

ISO 9001, LEED

Company Profile:

FSi manufactures and develop a complete range of market leading compartmentation systems (Fire Rated intumescent acrylic sealant, Fire Rated silicone, Graphite sealant, Ablative coating, FR pipe collars, FR Compound, Batts etc...) suitable for applications all over the world.

Alongside this we have a comprehensive range of test data backing up these innovative products. These systems are primarily used to prevent or slow down the passage of elements, such as fire, air, sound, movement and water. We pride ourselves on the high level of testing and technical expertise that has been built up through years of experience within the industry, from site hand to dealing with large Multi-National conglomerates, this

either under our brand or private label. This allows us to supply product both in the UK (BS Regulation) throughout Europe (EN Regulation) and Worldwide (EN and UL Regulation). All of our main products are 3rd party certified. We also offer a complete range of systems which are CE Marked, showing that our quality can be measured. We are here to help and make sure the correct solution is specified correctly the first time to ensure budgets, timescales and required specifications are kept to. Furthermore, alongside our market leading Fire Rated products, we manufacture as well a range of technical sealant (neutral cure silicone, acrylics etc) for application in the construction industry.

Year of Formation: 2014

Number of UK & Ireland Employees: 11-100

Member Type: Adhesive / Sealant / Formulated Product Suppliers

Company Profile:

Gorilla Glue Europe is part of The Gorilla Glue Company based in Cincinnati, Ohio. Gorilla as a brand has been available in the UK and Europe for over 10 years, with Gorilla Glue® itself sold in the USA for over two decades. The glue was first discovered being used in Indonesia on teak furniture, but consumers soon found it to be incredibly versatile and demand soared. On a mission to make products that deliver impressive results, the company has since expanded its offerings to include Gorilla Tape®, Gorilla® Super Glue, Gorilla® Grab Adhesive, and

other premium tapes, sealants, and adhesives. At Gorilla, we believe in high-quality products and choose to only put the Gorilla logo on products that meet rigorous development standards.

In addition to great products, we strive to be a great company for our employees. The Gorilla Glue Company is family-owned and operated and prides itself on its family atmosphere and fun-but-serious products. Our employees are our number one asset, and our company is dedicated to providing a healthy work culture centered on family values.

Company Profile:

INTERTRONICS supplies adhesives, coatings, sealants and equipment to customers with

high technology, high performance assembly applications. Our customers are manufacturers in industries such as electronics, medical devices, plastics, optical, automotive, energy, defence and aerospace.

We specialise in adhesives and adhesive systems, namely bonding, coating, sealing, encapsulating, potting, masking and gasketing products, together with the most appropriate equipment and accessories for surface preparation, mixing, application, dispensing, and curing them. The provision of insightful technical and applications guidance is a cornerstone of our business. We help you find the optimal materials and processes

for the manufacture, assembly or repair of your products, safeguarding and enhancing performance and integrity and, in turn, your profitability and reputation.

Ever since being established in 1979, when our main market was the printed circuit board assembly industry, we have enjoyed a reputation for customer focus, excellent service and post-sales support. We now supply over 3,000 regular customers, including multinational manufacturers, production facilities, specialist design and development businesses, universities, training organisations and government establishments.

Dewweld, Dfense Blok, Flexane, Floor Patch,
Korrobond, Zip Patch

Accreditations:

ISO 14001, ISO 9001

Company Profile:

PLEXUS is a brand of ITW Performance
POLYMERS, a division of Illinois Tool Works,
which has some 250 operating units in 33
countries worldwide.

PLEXUS range of structural adhesives is supplied
to many industries including Automotive,
Truck, Mass Transit, Marine and Construction.

The unique, high-performance structural
adhesives represent a breakthrough in
adhesive technology. They offer a combination
of convenience, ease of use and superior
mechanical strengths for bonding engineered
plastics, composites and metals.

PLEXUS adhesives can be mixed and dispensed
using hand held cartridge dispensers or through
automated metermix equipment. They are easy
to dispense and possess excellent gap-filling
characteristics. The thixotropic formulation
of PLEXUS adhesives allow use on vertical or
inverted surfaces without sagging and cure
on their own at room temperature. PLEXUS's
unique methacrylate technology is similar
to the chemistry of many recyclable plastics,
so PLEXUS adhesives may be reground and
remoulded with the plastic.

DEVCON is renowned as technology and market
leader in products and systems for plant
maintenance, repair and overhaul operations
plus all types of industrial high performance
structural bonding. A brand of ITW Performance
Polymers, Devcon offers a comprehensive range
of metal and ceramic filled epoxies, urethanes,
adhesives and sealants throughout the UK,
Europe, the Middle East and Africa. With over
40 years' experience, Devcon offers premium
quality products which are used across a vast
range of industries, solving problems, saving
time, and cutting costs. The product range
includes metal and ceramic-based epoxies,
which the company has pioneered since
the 1950's, containing either steel, bronze,
aluminium, stainless steel or titanium, and when
fully cured, can be drilled, taped or machined.

Company Profile:

Jim Palmer has over 40 years' technical
management experience in the adhesives,
sealants and coating industry. He is a business
professional, intellectually able and assertive,
with natural man management skills, and has
worked for small independent manufacturers
and large multinational corporations in the
course of his career. He has a broad knowledge

of manufacturing operations – i.e. technical,
quality, production, sales, purchasing, finance,
distribution and systems, combined with
experience of project management through
functional and multi-disciplined teams. Jim is
also conversant with the many regulatory issues
facing the modern chemical manufacturing and
downstream user industries.

FCA

Company Profile:

Thanks to over 30 years in the business, providing advice for companies in 'high hazard' industries, we have deep knowledge and

expertise of these businesses' insurance needs. Our knowledge and industry insight is fuelled by close working relationships with the leading industry organisations.

We fit insurance to your business rather than trying to fit your business to an insurance product. Every business is unique. At OAMPS, we make it our business to understand yours. We always begin by taking the time to gain an insight into how your business operates and all the risks you may be exposed to. That puts us in the best position to evaluate a wide range of insurance policies from leading insurers then recommend the risk management and insurance plan that best suits you. We offer a full suite of specialist insurance and risk management products for the

fuel, hazardous haulage, chemical and environmental sectors, including:

- Motor
- Property
- Goods in Transit
- Liability
- Business Interruption
- Personal Accident
- Directors & Officers Liability
- Cyber

OAMPS aims to help clients minimise risk through proactive Risk Management, however should you be unfortunate to be involved in an incident we have specialist services to make sure the process is as painless as possible and your business and reputation is protected.

Formulated Product Suppliers

Principal Trade Names:

Homemaker, Houseplan, Langlow, Laticrete, Palace

Accreditations:

ISO 45001, ISO 9001, OHS 18001

Company Profile:

Palace Chemicals Ltd is a privately owned UK based manufacturer of Building Chemicals & Adhesives and DIY products which includes a comprehensive range of tile and stone adhesives, grouts and surface "after-care" products under two distinctive brands, namely PALACE and LANGLOW whilst also offering a fully supported "private label" service for large nationwide distributors preferring to operate under their own brand. Whilst Tiling products remain the core activity for Palace Chemicals, we were originally established in 1978 as a

manufacturer of a broad range of building chemicals and damp-proofing products and this expertise remains a central part of the company's product range today. The Palace building products range still includes Water-proofing systems, timber treatments, mortar admixtures, general purpose building adhesives and protective surface coatings. Palace acquired Langlow Products in 1995 which is one of the pioneering DIY brands offering a unique and extensive range of DIY solvents, Decorating sundries, wallpaper adhesives, Fillers, sealants and Paint removers all under the LANGLOW brand and designed to suit the needs of the Decorating professional or DIY enthusiast. Palace Chemicals operates to standards accredited by the BSI for the Quality assurance, Environmental Management & Health & Safety Management and remains committed to developing product formulation and manufacturing technology which ensures the range offered is provided at optimum service levels and remains at the leading edge of all applicable performance and quality standards. The PALACE range includes an extensive portfolio of Tile and Stone adhesives, grouts, sealants and surface After-Care products along with floor levellers and building chemicals. The high reputation our products and services

have gained with both the professional and trade users encourages many of our larger customers & distributors to choose Palace as their private label partner. In the DIY sector we offer the LANGLOW brand range of products which is one of the UK's longest established DIY names and offers an extensive range of DIY solvents, Decorating sundries, Wood treatments, Wallpaper adhesives and Paint removers, all packaged and presented to suit the needs of the DIY & Decorating market. Recently Palace has become the UK licensed manufacturer of the Laticrete range of Adhesives; Grouts & Specialist tiling products, which have a global reputation in some of the world's most prestigious and ambitious construction projects where product performance levels are often well in excess of the more established standards and further enhances the range of advanced Technology manufactured by Palace.

Parent Company: Protecta Group AS

Year of Formation: 1993

Number of UK & Ireland Employees: <10

Member Type: Adhesive / Sealant / Formulated Product Suppliers

Principal Trade Names:

Graft IPT, Protecta

Accreditations:

ISO 14001, ISO 9001

Company Profile:

Leading the way since 1993, Polyseam specialise in manufacturing private label high performance fire protection products, adhesives, sealants, fillers and surface finishing products for many well-known global brands.

Our UK and European chemists, engineers and technicians continue to lead the field in research development and manufacture; and our own

market-leading brand is a direct result of their pioneering expertise.

Our partnership approach and extensive experience, allows us to work with you to create products that complement your existing brand range, and develop bespoke products that can really differentiate your brand.

Polyseam's manufacturing and packing operation is truly flexible, we offer cost-effective solutions for large organisations testing new or potential markets and products. As well as smaller companies requiring modest quantities. Our award of ISO 9001 standard underlines our commitment to optimum quality standards. Our award of ISO 14001 standard highlights environmental management system and multiple aspects of our business procurement, storage, distribution, product development and manufacturing.

Our Brands: Protecta, Painthouse and GRAFT. Protecta passive fire protection products continue to raise standards across our industry. You can trust our evidence-based, high performance fire protection products and systems to perform well. We invest in excellence

at every stage of the product lifecycle, from supporting those making crucial decisions about building structures and fit out, to the specialists on the front-line who are responsible for installing our product correctly.

Welcome to Painthouse. Healthier to live with, and kinder to the environment, we are a contemporary paint brand with a conscience. Our carefully curated colours are designed to inspire and inject warmth and personality into walls, wood or ceilings. Colours dry in as quick as 30 minutes and leave no lingering new paint smell. Water based, near zero VOC, non-toxic and emission free, easy to clean and wipeable; leaving a smooth, rich and non-reflective matt finish. While our hardwearing acrylic fire-retardant shades are developed and tested to protect against the spread of fire.

GRAFT incorporates a range of premium all-purpose sealants, adhesives and fillers, developed with the end user in mind. Designed for the professional, providing the ability to easily and effectively complete the widest range of tasks.

Company Profile:

Established over 30 years ago in Central
England, Structural Adhesives Ltd formulates,
manufactures and delivers high quality
bonding solutions worldwide. Today the
company continues to build on its reputation

and adeptness at problem solving in the
field of adhesive technology, supporting
and selling its range of adhesive products
to the particular industries of Aerospace,
Building and Construction, Engineering and
Transportation as well as working closely with
Engineers, Architects and Specifiers. We give
Industry leading advice concerning substrate
adhesion and specialist adhesive products and
application.

Our product range includes epoxy adhesives,
acrylic adhesives, hybrid polymer adhesives as
well as specialist paints. We currently produce
the only known A2-s1d0 adhesive certified for
use above 18 m that is available in the UK. We
invest heavily in Research and Development,
an area of our business we excel in. Our
experienced Chemists formulate innovative
products, always working closely in partnership
with our clients. Our commitment

Structural Adhesives Ltd

to sustainability, the environment and always
seeking better solutions drive our business
values.

As well as manufacturing our own recognisable
products, we also toll manufacture for other
companies, either in the form of 'own-label'
Structural Adhesives products, or, as a total
toll manufacture using our client's own
formulations. We are REACH compliant as well
as having ISO 9001:2015 certification from WCS.

Accreditations:

ISO 14001

Company Profile:

UK subsidiary of Wacker Chemie AG. Wacker

Chemie AG is the largest manufacturer of silicones in Europe with all manufacturing sites accredited to ISO 9001 and ISO 14001.

The ELASTOSIL® product range includes the full spectrum of silicone materials for all market sectors e.g. building and construction, rubber fabrication, consumer care, textile, paper, chemical, coatings, industrial sealing and bonding. For the Sealants industry Wacker offer raw materials as well as ready-compounded sealant in bulk, cartridges and foilpacks. In the GENIOSIL® range Wacker offer organofunctional silanes, prepolymers and "hybrid" sealants. WACKER POLYMERS is a leading producer of state-of-the-art binders and polymeric additives based on polyvinyl acetate and vinyl acetate copolymers. They are used in construction

chemicals, paints, surface coatings, adhesives and nonwovens, and in fiber composites and polymeric materials based on renewable resources.

Wacker also manufacture HDK® fumed silica - available in a range of hydrophilic and hydrophobic grades - which are used primarily for their thickening, thixotropic and reinforcing properties in the sealant, resin and surface coating industries.

Company Profile:

Wallace Hind Selection is a retained recruitment consultancy providing leading services to

major organisations and SMEs across the UK and Europe. Since our inception in 1992, we have significantly developed our recruitment services to cover a full range of job disciplines and market sectors, sourcing key talent for a diverse range of clients, from owner managed businesses through to some of the UK& Europe's most recognised FTSE 100 Brands. Our approach is structured, rigorous and comprehensive, one that consistently delivers. These approaches include traditional Headhunting, Executive Search and Talent Mapping to bespoke recruitment solutions. Partnering with you, we dedicate time and expertise to gain an in-depth understanding of

your business and your specific needs before undertaking any campaign. This affiliation is a two way process giving you the opportunity to question a recruitment expert about your brief, the most appropriate way to recruit, candidate availability, remuneration and timescales. We approach every campaign with the same values. • 72% of our business is repeat or recommended. • 87% of our business is retained. • Where we are retained, we fill 19 out of every 20 jobs. What we do really does make a difference. Due to the service levels we provide and the success rate of our process, many of our candidates become our clients. We are proud of our business and what we do.

Wessington Group Ltd

Address:

Blagrove House, 17 Blagrove Street, Reading, Berkshire, RG1 1QB

Tel: 0118 957 3300

Fax: 0118 959 1200

Email: jim.norman@wessingtonltd.com

Year of Formation: 1992

Number of UK & Ireland Employees: <10

Member Type: Raw Material Suppliers

Principal Trade Names:

Abzol, Santicizer, Thiokol, Wessacure, Wessaflex

Company Profile:

Wessington Group Ltd is a supplier of raw materials and formulation ingredients to the sealant, adhesive, coating, rubber/plastics and resin industries. We are the European and Middle East distributor for the Toray range of THIOKOL LP liquid polysulfide polymers. We also offer manganese dioxide and sodium perborate cure pastes for use with THIOKOL LP. Sealants, adhesives and coatings based on THIOKOL LP are used throughout the world in the construction, insulated glazing, marine, automotive and aircraft industries. Other relevant product offerings include DOTP (DEHT),

DINP, DICY, metallic stearates and calcium oxide. We are a knowledgeable and flexible company, providing a tailored approach and service to customers and suppliers. We aim to offer comprehensive technical understanding of our key products, with logistical support from stocks strategically located in the UK, NL and UAE. Wessington Group Ltd is an ISO 9001 registered company and participates in the Chemical Business Association 'Responsible Care' programme. We are an active member of Trade Associations including BASA, BPF and the CBA.

WhitChem Limited

Address:

23 Albert Street, Newcastle-under-Lyme, Staffordshire, ST5 1JP

Tel: 01782 711777

Email: enquiries@whitchem.co.uk

Parent Company:

Whitfield Chemical Group Limited

Year of Formation: 1973

Number of UK & Ireland Employees: 11-100

Member Type: Raw Material Suppliers

Company Profile:

Distributor of polymers, minerals fillers, pigments and additives for the Adhesives industry in the UK and Ireland. Raw materials for Adhesives: Polyvinylalcohol, Polyurethane (Polyols, Isocyanates, PU resins and PU dispersions), Polychloroprene dispersions, Inorganic pigments, Rubber (NBR, SBR, SBS and SEBS), Minerals and Functional Fillers (Kaolin, Calcium Carbonate, Perlite, Mica), Moisture

scavengers, Rheological additives Special additives and Colloidal Silica. Distributing on behalf of companies such as Covestro, Castor International, Dynasol, Imerys, Lanxess, Nouryon, ShinEtsu, S.E. Tylose.

Williams Consultancy Professionals

Address:

24 Laurel Close, Mepal, Ely, Cambridgeshire, CB6 2BN

Tel: +44 1353 440299

Fax: +44 1353 440366

Email: admin@willconpro.com

Year of Formation: 2015

Number of UK & Ireland Employees: <10

Member Type: Testing / Consultant / Equipment / Services

Company Profile:

Based in Mepal, Cambridgeshire, Williams Consultancy Professionals (WCP) are a family company partnership run by Lorna, James and Rebecca Williams. WCP are contracted to provide the British Adhesives & Sealants Association (BASA) Secretarial Services and James Williams offers bespoke engineering designs/moulds/test pieces for the adhesives and sealants industry. Lorna also offers

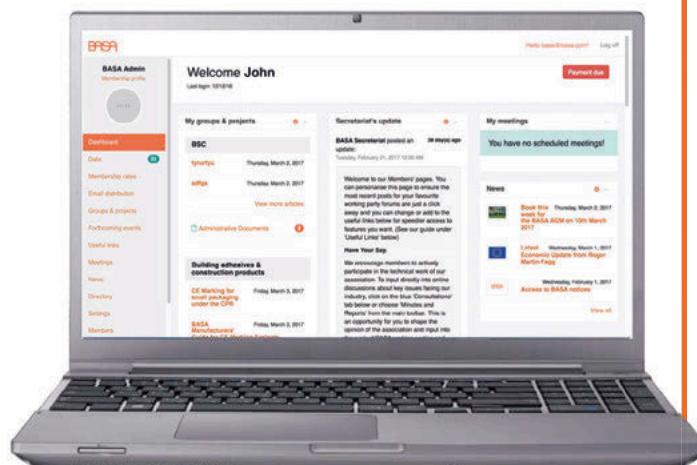

Consultancy services based on her 25 years' experience in the industry and her previous and current involvement in CEN and ISO sealants and adhesives committees.

www.willconpro.com

www.basa.uk.com

Visit BASA's Website

BASA is the trade association for the adhesives and sealants industry in the UK and Ireland. the 100 member companies span the full range of activities from manufacturing, through to distribution, including suppliers to the industry and machinery manufacturers.

START GROWING YOUR BUSINESS NOW

For over 35 years, MA Knowledge has been supplying the engineering and manufacturing industry with high quality, targeted business leads

- ✓ Data rental

HOW OAMPS CAN HELP BASA MEMBERS

Having provided advice for companies in 'high hazard' industries for more than 30 years, we have developed extensive knowledge of the risks and hazards these businesses face, and use this expertise to help tailor insurance cover for businesses like yours.

Every business is unique, and at OAMPS, we make it *our* business to understand yours; taking the time to understand how your business operates and all the risks you may be exposed to. Our knowledge and expertise allows us to assess how effective your risk management strategy is, and to offer suggestions where appropriate. Taking the time to get to know your business enables us to truly tailor our proposal to fit your businesses own unique needs, and be able to recommend the risk management and insurance plan that best suits your business.

We offer a full suite of specialist insurance and risk management products for the fuel, hazardous haulage, chemical and environmental sectors, including:

- Motor
- Property
- Goods in Transit
- Liability
- Business Interruption
- Personal Accident
- Directors & Officers Liability
- Cyber

Although our aim is to minimise risk through proactive risk management, should an incident occur, we have specialist services to make sure the process is as painless as possible, your business is protected and your hard earned reputation remains intact through effective early intervention.

WHO CAN WE HELP?

Companies who manufacture, blend, wholesale, import/export, store and/or haul chemicals across a diverse range of industry sectors.

So please contact us today to see how we can help you.
