

# Thermal Analysis of Composites, Adhesives, Polymers, Elastomers and Sealants

27 November 2018  
TWI, Cambridge, CB21 6AL

The increasing role of thermal analysis and calorimetry techniques used to assess polymers, composites, adhesives, elastomers and sealants not only provides opportunities, but also measurement challenges.

This seminar aims to bring together scientists, engineers and industry specialists to present and discuss the research, innovative developments, best practice and measurement solutions offered using the wide ranging thermal analytical techniques.

## Call for papers

Abstract submission deadline 26 October 2018

See [www.thermalmethodsgroup.org.uk](http://www.thermalmethodsgroup.org.uk) for abstract submission guidelines

### The day will include:

- Presentations from industry and academic researchers
- Poster Competition
- Manufacturers Technical Exhibition

Delegate: **£150 \***

Students: **£80**

Exhibitors: **£350 \*\***

\* Discounted rate of £120 for RSC, TMG and TWI Members

\*\* Includes one delegate registration

**Registration link:** [www.thermalmethodsgroup.org.uk](http://www.thermalmethodsgroup.org.uk)
